

ARMCHAIR INVESTOR^(sm) MORNING MARKET NEWSLETTER

A TREND-FOLLOWING STRATEGY*

(*For that part of your portfolio which is invested in a **market-tracking ETF** like the **QQQ**.)

MARKET DIAGNOSIS: UPTREND

LAST WEEK: Market continues UP – both major indexes have only one slightly down day in the last 2 weeks! I hope you are riding the wave!

For the two weeks:

- The Nasdaq is up 5.2%
- The S&P500 is up 4.2%

Look at last week's action. Wow!:

LAST WEEK'S MARKET ACTION

| 1/12/2018 | Index % Change | Volume % Change | Volume Above/ Below 10-week Avg | Type of Week |
|-----------|----------------|-----------------------------|---------------------------------------|--------------------|
| Nasdaq | +1.7% | +24.9% | +10.0% | Major Accumulation |
| S&P 500 | +1.6% | S&P 500 Volume +26.2% | +12.0% | Major Accumulation |
| NYSE | +1.5% | | | Major Accumulation |
| DJIA | +2.0% | | | Major Accumulation |

The "TYPES OF WEEK" are:

ACCUMULATION WEEK Price RISES 0.2% or more and Volume RISES

DISTRIBUTION WEEK Price FALLS 0.2% or more and Volume RISES

Another type of DISTRIBUTION(*): WEEK Price FALLS 0.2% or more & Volume is 15% or more above average even without an increase in volume. The NYSE volume is used for the S&P500 and NYSE Composite.

The market is rising so fast that **distribution days are dropping out of the distribution count** not timing out as they usually do (becoming over 20 days old). Instead, the distribution days have dropped out of the count because the market has risen too far above them for them to be relevant anymore (over 5%). Is it the new tax law? A good earnings season? I don't know. But I do know this is a great time to be in the market.

NOTE: if you aren't comfortable investing in individual stocks, consider following this newsletter and invest in an ETF that tracks the Nasdaq (even a double or triple appears to be in interesting place to invest at the moment.) See the ETF table below. Do your own research before taking and investing action.

If you have any doubts about the strength of this current market, open the full newsletter and scan down the **MARKET FACTORS, COUNTS & RATINGS** table (near the end.) **Everything is GREEN!**

FRIDAY: Another good day!

I am a little concerned that the market may be showing signs of a climax top in the current accelerating growth rate of the S&P500 and Nasdaq. Sometimes, this increasing slope is caused by expectations of increasing earnings. Well that makes sense and can be sustainable.

But sometimes, the increasing slope is an indication of irrational exuberance which usually ends badly with a quick drop. If that is the case, we won't know till after it happens! It may make sense to put in a trailing stop if you are in a trend-following ETF. Just leave some "wiggle room" for the ETF to grow.

| Daily Market Action | | | | | | |
|---------------------|-------------|----------------|-----------------|-----------------------|-----------------------------------|--|
| 1/12/18 | Index Close | Index % Change | Volume % Change | Volume vs 50-day Avg. | Accumulation or Distribution Day? | Current Trend: UPTREND Began 6/30/2016 |
| Nasdaq | 7261.06 | +0.7% | +0.1% | +0.9% | Neither | +50.1% |
| S&P500 | 2786.24 | +0.7% | NYSE Volume | | Neither | +32.7% |
| NYSE | 11,771.61 | +0.6% | -1.8% | +6.9% | Neither | +12.2% |
| DJIA | 25,803.19 | +0.9% | | | Neither | +44.0% |

I see NO significant signs of market weakness.

The market still has a VERY low number of distribution days:

- The Nasdaq distribution day count is 1.
- The S&P500 distribution day count is 0.

INDIVIDUAL STOCKS: Holding onto your winners is a prudent strategy right now as long as they don't show signs of failing such as a concentration of distribution days. Don't let the emotions of non-fact based commentators persuade you to sell some of your winners just to pocket some of the gains.

HAVE YOU READ THE COMMENTS ABOUT in the ADDITIONAL COMMENTS FOR INVESTORS IN INDIVIDUAL STOCKS table in the FULL Armchair Investor newsletter? Available at www.armchairinvestor.com.

**REMEMBER:
THE MARKET CONTINUES IN THE DIRECTION IT'S GOING UNTIL
IT DOESN'T.**

Do you know when your stocks report? You can look at your brokerage site or go to:
www.Finance.yahoo.com/calendar/earnings

Sometimes a stock price drops even if it has a good earnings report. How can that happen? The market is more interested in the future than the past. After a good earnings report, the market immediately says:

“Atta boy! Good job! Now.....what are going to do for me next?”

If forward guidance is weak, there may be a sell-off!

For additional information on how to protect a portfolio during earnings season, download the full Armchair Investor Newsletter (link below) and review the ADDITIONAL COMMENTS FOR INVESTORS IN INDIVIDUAL STOCK section.

ARMCHAIR INVESTOR TREND-FOLLOWING RETURNS FOR CURRENT UPTREND.

When I can't get fully invested in an Uptrending market, the ETFs are where I sometimes store my money to capture the general market rise.

Since this Uptrend was signaled on June30, 2016, the Trend-Following Returns table on page 3 will show you what you would have earned in the ETFs:

- +53% return for the QQQ
- +130% returns for the QLD
- +239% return for the TQQQ

Note: I didn't make 239% in the QLD. I made a little less because I didn't hold the TQQQ during periods of market uncertainty (higher distribution counts) in the last year and a half! But you could have earned much of that return following the signals identified in this newsletter, even with the occasional move to the QQQ!

You can download the FULL ARMCHAIR INVESTOR NEWSLETTER at:

ADDITIONAL COMMENTS FOR INVESTORS IN INDIVIDUAL STOCKS

More detailed comments on market direction and technical analysis for individual stocks

FRIDAY : Eight rising days out of nine for 2018! Nice!

PLEASE READ THIS “LAGGING RS LINE” WARNING IF YOU MISSED IT:

I am staying away from many stocks with lagging RS (relative strength) lines in their latest base. An RS line usually dips while the left side of a base is formed – it frequently represents a divergence from the general market progress. But a good stock will make up the dip (and frequently more) as it builds the right side of the base so the RS line recovers. When the base ends with a lagging RS line, it means this stock has under-performed the market average.

I seldom want to buy stocks that are in the bottom half of market performance. Recently, I have skipped (or bought smaller positions) in some stocks with otherwise excellent ratings but have lagging RS lines in the most recent base. **OK, I did like a few that had only slight RS line declines but other strong ratings.**

HERE'S ONE TO WATCH AND LEARN FROM:

One stock you should look at is **Arista Networks (ANET)**. It broke out of a second stage base last Friday with 53% above average volume and has risen nicely.

ANET UPDATE AS OF FRIDAY 1/12:

As of Friday, ANET was **1/2% out of the buy zone**. You might catch it if you put in a stop at 5% over the 245.75 buy price from the cup. Stocks frequently dip a bit before rising more. **I do not make recommendations in this newsletter** – but will sometimes point out educational opportunities one to learn from. Do your own research and make your own decisions! It has an RS line that held up over that cup!

RECENT NOTES THAT ARE STILL RELEVANT:

Earnings season is upon us! Review your holdings to decide if you are willing to risk a sudden “adjustment” in their prices if an earnings surprise disappoints.

An 8% gain in your stock can be a buffer to protect you against a temporary drop response to its earnings announcement. If your stock has not produced at least an 8% gain, you may want to exit it or protect your portfolio against a negative earnings result with a stop. Some protective strategies include:

1. Put in a stop loss order to automatically sell your stock if it dips too much.
2. Sell stocks without an 8% buffer (gain.)
3. Buy a protective put.

Please talk to your broker if you are not clear on which of these strategies is right for you. Each can be tricky to implement and yield a nasty surprise if not set up correctly.

YOU ARE NOT SMARTER THAN THE MARKET

You can remember my second lesson for every new investor:

THE MARKET AND STOCKS CONTINUE IN THE DIRECTION THEY ARE GOING..... UNTIL THEY DON'T.

I bet a few of you are asking, "What is the first lesson?" You might know it so well that you have integrated it your investing and forgotten it:

PROTECT YOUR PORTFOLIO WITH AN 8% STOP

And, yes. You may have chosen a tighter 7% or 6% stop. The most important aspect of this first rule is:

CHOOSE YOUR STOP & LIVE BY IT – NO EXCUSES!

And you don't have to wait for your stock to fall to the stop. A concentration of distribution is a good reason to get out wherever it happens!

=====

Uptrending markets usually climb a "wall of worry." The more worry, the better the climb. Consider these perspectives:

- If you heard a lot of worrying news and believed the market was ready to fail, you would sell much of your stock at today's "high prices." If the market continues to rise after you sold, you would

eventually reinvest in the market to participate in the uptrend. You would have missed the profit between your leaving the market and getting back in it.

- **The lesson:** Follow the market strength signals, not the dramatic words on the news.

Don't be one of the inexperienced investors convinced to sell in an Uptrending market.

Remember:

The market AND YOUR STOCKS continue in the direction they are going until they don't.

MARKET DIAGNOSIS: "UPTREND"

What to do now:

1. **WATCH YOUR INVESTMENTS CLOSELY:** Do a quick review of each stock you own every night. Look for strength and weakness signals in the price-volume action, especially watching for distribution (signs of institutional selling)
2. **DON'T LOSE YOUR GAINS:** Sell any stock that is showing a concentration of distribution days
3. If you **need cash** for a hot new breakout, consider selling a stock that was a strong buy but hasn't taken off. It might be languishing near the buy point or it might have already round-tripped – risen from a good buy point and bombed back or below the buy price.

EXPLANATION OF TERMS FOR THE

MARKET ACTION OVER THE LAST 20 DAYS

Four weeks of price and volume action reveal much about the direction of the market and the strength of that movement.

| | | Price | | Volume | |
|---|---------------|-------|---|--------|------|
| Healthy Uptrend Price-Volume Movement | Strong Action | Up | ↑ | ↑ | Up |
| | Weaker Action | Down | ↓ | ↓ | Down |
| Healthy Downtrend Price-Volume- Movement | Strong Action | Down | ↓ | ↑ | Up |
| | Weaker Action | Up | ↑ | ↓ | Down |

The chart below identifies the **market direction** indicated by the Nasdaq's price and volume action for the last 20 days at two levels of significance.

ACCUMULATION/DISTRIBUTION COLUMN - TELLS YOU WHERE THE BIG MONEY IS GOING

The listing includes: the date, Nasdaq closing price and percent change of the Nasdaq price and volume.

- The next column identifies days that were **Major Accumulation** (serious UPTREND indicator) or **Major Distribution** (serious Downtrend indicator) using the 1% minimum rise or fall with higher volume.
- **Minor accumulation** and **minor distribution days** are also identified – days that moved 0.2% or more but less than 1%.

“CONSISTENT WITH” – THE SUBTLE, BUT TELLING MOVES

The last column is an UPTREND /Downtrend indicator.

Think of a healthy Uptrend. It will have many days where the index rises with increased volume.

But even in the most robust Uptrend, * not every day will be up. In any Uptrend, there will be some down days. If they have higher volume, then the day becomes a distribution day but if the volume is lighter (as frequently happens in an Uptrend), then the down day is NOT a distribution day. In fact, a drop on lighter 4747.62 volume says they market is NOT selling off heavily – good news and consistent with the Uptrend.

Using the Healthy UPTREND/Downtrend price and volume movement listed above.

- For example, if the Nasdaq closing price rose 0.7% and the volume rose 2% (up and up), that movement is “consistent with” the price-volume action of a Healthy UPTREND.
- If the price drops 0.5% and the volume rises 1.2% (down and up), that movement is “consistent with” the price-volume action of a Healthy Downtrend as indicated in the table above.
- Any index change less than + or – 0.3% or volume change less than + or – 1% has no “consistent with” notation. Price and volume movements that small is not strong enough to tell us about the market movement.

ARMCHAIR INVESTOR WEEKLY CLASS SCHEDULE

Join us for the ARMCHAIR INVESTOR classes.

Be my guest (FREE) if you have not visited in the last six months (guest seating limited).

Please register on the Meetup site so I will have a handout for you (25 pages of articles and [Link to registering for the Armchair Investor Meetup- CLICK HERE](#))

The regular 2018 ARMCHAIR INVESTOR classes schedule then resumes next week:

Mondays 6:00 – 8:00 p.m. Barnes & Noble at Royal & Preston (northeast corner), Dallas
Tuesdays 3:30 – 5:30 p.m. Barnes & Noble at Royal & Preston (northeast corner), Dallas
Wednesdays 10:00 am – noon, Barnes & Noble, on Beltline just east of Montfort, Addison

- **Guest attendance is limited to ensure class members get their full value. -**
- **Be sure to call to confirm we are having a class (we are occasionally on vacation) and an open chair.**

Call or text me at 214-995-6702 to schedule your FREE visit (new visitors only) to an ARMCHAIR INVESTOR class.

**TO REGISTER FOR THE COMPREHENSIVE, SINGLE SUBJECT
ARMCHAIR INVESTOR WORKSHOPS
OR TO VISIT AN ARMCHAIR INVESTOR CLASS:**

CALL OR TEXT CHARLOTTE HUDGIN AT 214-995-6702

Wishing you "Many Happy Returns,"

Charlotte Hudgin, 214-995-6702, Editor, the Armchair Investor

DISCLAIMER, "Buyer Beware" WARNING:

This newsletter shares the ideas I use in my investing. It is not investing advice but should be taken as education only. Your investment decisions are your responsibility as are the results. If you are not comfortable with or do not understand a strategy completely, I recommend that you paper-trade until you are successful and can sleep at night.

Questions may be submitted to [o](#)

Some of your questions will be used in future newsletters.

Armchair Investor, P.O. Box 671146, Dallas, TX 75367, USA

Additional notes follow:

EXAMPLE OF ACCUMULATION AND DISTRIBUTION WITH EXPANDED EXPLANATION OF TERMS:

| Today's Market Action with explanation | | | | | | |
|--|-------------|----------------|-----------------|----------------------|-----------------------------------|---|
| 2/5/16 | Index Close | Index % Change | Volume % Change | Volume vs 50-day Avg | Accumulation or Distribution Day? | Current Trend: DOWNTREND Began 1/4/2015 |
| Index | 4363.14 | -3.2% | +13.8% | +21.8% | Major Distribution | +11.3% |
| S&P500 | 1879.92 | -1.9% | NYSE Volume | | Neither | +6.6% |
| NYSE | 9,390.33 | -1.5% | -5.3% | +15.0% | Neither | +6.2% |
| DJIA | 16,204.62 | -1.3% | | | Neither | +5.5% |

A **Major Accumulation Day**: Price RISES 1.0% or more and higher Volume than the day before
A **Minor accumulation Day**: Price RISES 0.2% or more and Volume is strong (either higher volume or is well-above average volume)

A **Major Distribution Day**: Price FALLS 1.0% or more and higher Volume than the day before.
A **Minor distribution Day**: Price FALLS 0.2% or more, Volume is strong (either higher volume or is well-above average volume)

A **Stalling minor distribution Day**: Only in an up-trending index or stock, price is FLAT or DOWN slightly compared to the day before, closing in the bottom half of the day's range and volume is heavier or about equal to the day before or strong compared to the past market. It's the price closing low in the day's range after an uptrend that is the key for this designation. Price close to flat and higher or consistent volume indicates the big money (institutions: mutual funds, banks, etc.) are gently selling, trying to sneak out so you won't notice.

** The "CURRENT TREND" column calculates how far each index has moved in the current trend assuming you purchased the index (which is not buyable) at the opening price on the day after the trend change signal.

- **When this column is GREEN, the index has moved in the direction of the market trend.**
- **HOWEVER, when this column is RED, the index change has fallen into negative territory (which could be a rise during a Downtrend)**

An **ACCUMULATION** day points at heavy buying by institutional money managers - the mutual funds, pension funds, banks, etc.
A **DISTRIBUTION** day points at heavy selling by institutional money managers.
