

ARMCHAIR INVESTOR^(sm) MORNING
MARKET NEWSLETTER
 A TREND-FOLLOWING STRATEGY

The market is in UPTREND

Tuesday's Follow-through day signaled the start of a new Uptrend. Now let's see if it holds.

THURSDAY: I am encouraged as I look at the daily charts of the Nasdaq and S&P500. Download the full newsletter to see the both daily charts with support lines added in. Or open a daily chart on any charting system and draw an upward sloping support line underneath the price bars of either index. Can you see the price hopping right up that line?

The highs aren't yet that organized, but the rising daily lows tell me the **bulls are gently accumulating stock**. When they buy all available stock at one price, they have to hop up a little higher to continue buying.

Not every new Uptrend takes off right away. One concern right now is the low volume. Look at the Daily Market Action table below to see that the Tuesday volume was well below the 50-day moving average:

- Nasdaq's volume was 13% below its 50-day moving average.
- S&P500's volume was 20% below its 50-day m.a.

DAILY MARKET ACTION

4/12/18	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss: 4/10TREND
Nasdaq	7,140.25	+1.0%	+10.8%	-13.0%	Major Accumulation	+1.2%
S&P500	2,663.99	+0.8%	NYSE Volume		Neither	+0.8%
NYSE	12,580.22	+0.5%	+0.1%	-20.0%	Neither	+0.6%
DJIA	24,483.05	+1.2%			Neither	+0.9%

A Major Accumulation Day: Price RISES 1.0% or more and higher Volume than the day before
 A minor accumulation Day: Price RISES 0.2% or more and Volume is strong (either higher than the day before or is well-above average volume)
 A Major Distribution Day: Price FALLS 1.0% or more and higher Volume than the day before
 A minor distribution Day: Price FALLS 0.2% or more and Volume is strong (either higher than the day before or is well-above average volume)

TREND-FOLLOWING ACTION: With the new shift to Uptrend, exit any Downtrend market tracking ETFs such as the PSQ, QID and SQQQ.

You have two Trend-following actions to take in a new Uptrend:

1. Buy an Uptrend ETF such as the QQQ, QLD and TQQQ.
2. Cover any individual stocks you have shorted.

REMEMBER:

THE MARKET CONTINUES IN THE DIRECTION IT'S GOING UNTIL IT DOESN'T.

THE ARMCHAIR INVESTOR strategy is SIMPLE:

- Be in the market when it is going up.
- Be out or (or short) the market when it is going down.
- Protect yourself with an 8% stop.

FOR INVESTORS IN INDIVIDUAL STOCKS

More detailed comments on market direction and technical analysis for individual stocks

THURSDAY: The percent of stocks with A and B Accumulation/Distribution ratings by Investor's Business Daily is rising. We aren't yet near the pre-downtrend percentages, but should see them continue to rise as the indexes rise. (See the PROGRESS IN ACCUMULATION/DISTRIBUTION RATINGS table in the full newsletter)

Here are Wednesday's note on buying back recently sold stocks.

Realize that good stocks from the recent past may not be the big winners again. A rotation of winning sectors is not uncommon. Evaluate each stock you own and each you are considering to buy.

- Do they meet all of the CAN SLIM criteria?
 - If they don't, you can put them on a watch list.
- The stocks to focus on at the beginning of a new Uptrend are the current top performers
 - Let the numbers be your guide.
- The Investor's Business Daily stock lists are a great place to search for strong stocks in their buy ranges:
 - The IBD50 available in the weekly newspaper with annotated charts, and as a list every day under the Stock Lists tab.
 - The Leaders UP on Volume list in the Big Picture Market Pulse box every day under the Market Trend tab.
 - MarketSmith 250 daily lists including the "Stocks breaking out" and "Stocks near a Breakout" lists.

CASH IS A POSITION.

The market diagnosis is UPTREND.

REMEMBER:

YOU ARE NOT SMARTER THAN THE MARKET

THE MARKET AND STOCKS CONTINUE IN THE DIRECTION THEY ARE GOING..... UNTIL THEY DON'T.

PROTECT YOUR PORTFOLIO WITH AN 8% STOP

CHOOSE YOUR STOP & LIVE BY IT – NO EXCUSES!

And you don't have to wait for your stock to fall to the stop. A concentration of distribution is a good reason to get out wherever it happens!

The market AND YOUR STOCKS continue in the direction they are going until they don't.

What to do now:

1. **WATCH YOUR INVESTMENTS CLOSELY:** Sell stalling and falling stocks quickly.
2. Do a quick **review of each stock you own every night.** Look for strength and weakness signals in the price-volume action, especially watching for distribution (signs of institutional selling)
3. **DON'T LOSE YOUR GAINS:** Sell any stock that is showing a concentration of distribution days. I sell more quickly in a Downtrend

EXPLANATION OF TERMS FOR THE

MARKET ACTION OVER THE LAST 20 DAYS

Four weeks of price and volume action reveal much about the direction of the market and the strength of that movement.

		Price		Volume	
Healthy Uptrend Price-Volume Movement	Strong Action	Up	↑	↑	Up
	Weaker Action	Down	↓	↓	Down
Healthy Downtrend Price-Volume- Movement	Strong Action	Down	↓	↑	Up
	Weaker Action	Up	↑	↓	Down

The chart below identifies the **market direction** indicated by the Nasdaq's price and volume action for the last 20 days at two levels of significance.

ACCUMULATION/DISTRIBUTION COLUMN - TELLS YOU WHERE THE BIG MONEY IS GOING

The listing includes: the date, Nasdaq closing price and percent change of the Nasdaq price and volume.

- The next column identifies days that were **Major Accumulation** (serious UPTREND indicator) or **Major Distribution** (serious Downtrend indicator) using the 1% minimum rise or fall with higher volume.
- **Minor accumulation** and **minor distribution days** are also identified – days that moved 0.2% or more but less than 1%.

“CONSISTENT WITH” – THE SUBTLE, BUT TELLING MOVES

The last column is an UPTREND /Downtrend indicator.

Think of a healthy Uptrend. It will have many days where the index rises with increased volume.

But even in the most robust Uptrend, * not every day will be up. In any Uptrend, there will be some down days. If they have higher volume, then the day becomes a distribution day but if the volume is lighter (as frequently happens in an Uptrend), then the down day is NOT a distribution day. In fact, a drop on lighter 4747.62 volume says they market is NOT selling off heavily – good news and consistent with the Uptrend.

Using the Healthy UPTREND/Downtrend price and volume movement listed above.

- For example, if the Nasdaq closing price rose 0.7% and the volume rose 2% (up and up), that movement is “consistent with” the price-volume action of a Healthy UPTREND.
- If the price drops 0.5% and the volume rises 1.2% (down and up), that movement is “consistent with” the price-volume action of a Healthy Downtrend as indicated in the table above.
- Any index change less than + or – 0.3% or volume change less than + or – 1% has no “consistent with” notation. Price and volume movements that small is not strong enough to tell us about the market movement.

EXAMPLE OF ACCUMULATION AND DISTRIBUTION WITH EXPANDED EXPLANATION OF TERMS:

Today's Market Action with explanation						
2/5/16	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg	Accumulation or Distribution Day?	Current Trend: DOWNTREND Began 1/4/2015
Index	4363.14	-3.2%	+13.8%	+21.8%	Major Distribution	+11.3%
S&P500	1879.92	-1.9%	NYSE Volume		Neither	+6.6%
NYSE	9,390.33	-1.5%	-5.3%	+15.0%	Neither	+6.2%
DJIA	16,204.62	-1.3%			Neither	+5.5%
<p>A Major Accumulation Day: Price RISES 1.0% or more and higher Volume than the day before</p> <p>A Minor accumulation Day: Price RISES 0.2% or more and Volume is strong (either higher volume or is well-above average volume)</p> <p>A Major Distribution Day: Price FALLS 1.0% or more and higher Volume than the day before.</p> <p>A Minor distribution Day: Price FALLS 0.2% or more, Volume is strong (either higher volume or is well-above average volume)</p> <p>A Stalling minor distribution Day: Only in an up-trending index or stock, price is FLAT or DOWN slightly compared to the day before, closing in the <u>bottom half of the day's range</u> and <u>volume is heavier or about equal to</u> the day before or strong compared to the past market. It's the price closing low in the day's range after an <u>uptrend</u> that is the key for this designation. Price close to flat and higher or consistent volume indicates the big money (institutions: mutual funds, banks, etc.) are gently selling, trying to sneak out so you won't notice.</p>						
<p>** The "CURRENT TREND" column calculates how far each index has moved in the current trend assuming you purchased the index (which is not buyable) at the opening price on the day after the trend change signal.</p> <p>• When this column is GREEN, the index has moved in the direction of the market trend.</p> <p>• HOWEVER, when this column is RED, the index change has fallen into negative territory (which could be a rise during a Downtrend)</p>						
<p>An ACCUMULATION day points at heavy buying by institutional money managers - the mutual funds, pension funds, banks, etc.</p> <p>A DISTRIBUTION day points at heavy selling by institutional money managers.</p>
