**CURRENT MARKET DIRECTION:
UPTREND under PRESSURE**

Last week was a very good week for investors in uptrend positions - market-tracking ETFs AND leading stocks.

LAST WEEK'S MARKET ACTION

7/6/2018	Weekly Index % Change	Weekly Volume % Change	Volume Above/ Below 10-week Avg	Type of Week
Nasdaq	+2.5%	-43.3%	-38.0%	Neither
S&P 500	+1.6%	S&P 500	Volume	Neither
NYSE	+1.5%	-42.2%	-38.0%	Neither
DJIA	+1.0%			Neither

The "TYPES OF WEEK" are:

ACCUMULATION WEEK

PRICE RISES 0.2% or more and VOLUME RISES

DISTRIBUTION WEEK

PRICE FALLS 0.2% or more and VOLUME RISES

Another type of DISTRIBUTION(*): WEEK PRICE FALLS 0.2% or more & VOLUME is 15% or more above average even without an increase in volume.

The NYSE volume is used for the S&P500, DJIA and NYSE Composite.

Although the "Leaders Up in volume/Leaders Down in volume" ratio is still low (0.7 = 7 leaders up to 10 down), the last 6 days show a marked, positive reversal. **The leader up/down ratio over the last 6 days was 15:8, almost 2 to 1, a powerful uptrend statement.**

Both **20-day** distribution days have dropped slightly showing moderate selling:

- The S&P500 has 4 distribution days.
- The Nasdaq has 5 distribution days.

Note, my counts may differ slightly from IBD's which include 25 days in their count.

FRIDAY

The good news is: **THE 50-DAY LINE CONTINUES TO BE SUPPORT** – a positive sign. See Nasdaq and S&P500 daily and weekly charts, annotated with my trend lines to help you understand how to draw them, in the FULL Armchair Investor newsletter.

DAILY MARKET ACTION

7/6/18	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss from 4/10/2018 UPTREND SIGNAL
Nasdaq	7,688.39	+1.3%	-3.0%	-19.1%	Neither	+9.0%
S&P500	2,759.82	+0.9%	NYSE Volume		Neither	+4.4%
NYSE	12,664.88	+0.6%	-13.0%	-27.2%	Neither	+1.2%
DJIA	24,456.48	+0.4%			Neither	+0.8%

Market rose nicely until noon. Then price held to end of day (light volume) as traders went home to finish the holiday shortened week with a cool beverage!

Are You a Trend Trader? Hold your trend-following ETF (such as QQQ, QLD, TQQQ) You have just recovered 73% of the recent drop!

Remember: It is hard for the big money (funds, banks and money managers) to **hide their actions**. But if you follow this newsletter, you will also learn to interpret their stealth moves and take appropriate action like holding during the recent 3-week dip so you immediately capture the recovery gains as we did last week.

Do you invest in Individual Stocks? Always consider taking some profit if **significant distribution is showing up for your individual stocks**. However, many individual stocks are rising with gusto! Look at all the lists in the Investor's Business Daily newspaper for stocks breaking out with high volume. **They are there!**

UPTREND ETFs	ARMCHAIR INVESTOR TREND-FOLLOWING RETURNS for Current Uptrend			
	Opening Price on 4/11/2018	Today's Price	ETF % Change Today	GAIN OR LOSS SINCE 4/10/2018 UPTREND SIGNAL
QQQ (1x)	160.20	175.61	+1.5%	+9.6%
QLD (2x)	76.06	90.49	+3.0%	+19.0%
TQQQ (3x)	47.53	61.08	+4.5%	+28.5%

The ETF QQQ is designed to move WITH the largest 100 stocks on the Nasdaq. QLD is designed to double the price move of the QQ. The TQQQ is a more volatile Visit Proshares.com for more information.

HOW DO YOU EARN THOSE GREAT RETURNS SHOWN ABOVE?

You can do it in less than 5 minutes a day. Follow the Armchair Investor Trend-following Strategy instructions below.

- When the Market direction moves into **UPTREND**:
 - Buy an **UPTREND ETF** (and sell any **DOWNTREND ETF** you own)
- When the Market direction moves into **DOWNTREND**:
 - Buy a **DOWNTREND ETF** (and sell any **UPTREND ETF** you own)
- Repeat!!

Uptrend ETFs that follow the Nasdaq are QQQ, QLD and TQQQ

Not all market turns result in a profit. But overall, historically, they have beaten the market by multiples.

To get a sense of the health of the market, look at the **MARKET FACTORS, COUNTS & RATINGS table** included each day in the FULL Armchair Investor newsletter. It looks at 7 key market direction factors and highlights the leaning of each:

- If the factor leans toward the Uptrend, that box will be green
- If the factor leans toward the Downtrend, that box will be orange or red

TODAY THE MARKET LEANS TO THE YELLOW - UPTREND UNDER PRESSURE

**The UPTREND is “UNDER PRESSURE”
(UNCERTAIN HEALTH)**

Some individual stocks have caught the Uptrend fever. They have price AND volume. I am buying full positions (through pyramiding in) of a very few top stocks with strong breakouts.

REMEMBER:

**THE MARKET CONTINUES IN THE DIRECTION IT'S GOING
UNTIL IT DOESN'T.**

*And in case you missed it, an “Uptrend under Pressure”
is still an Uptrend!*

THE ARMCHAIR INVESTOR strategy is SIMPLE and FAST to execute:

- **Be in the market when it is going up.**
- Be out or (or short) the market when it is going down.
- Protect yourself with an 8% stop.

No advice is ever given in this newsletter. It is provided for your education only.

MARKET ACTION 2018 YEAR-TO-DATE

7/6/18	2017 Closing Price	Current Price	Index % Change Year-to-Date
Nasdaq	6903.39	7688.39	+11.4%
S&P 500	2673.61	2759.82	+3.2%
NYSE Comp	12,808.84	12,664.88	-1.1%
DJIA	24,719.22	24,456.48	-1.1%

This yearly table is included for your reference. These returns have little relevance to trend-following returns since trend-followers do not hold during "Downtrends" and may lighten their holdings during "Uptrends under Pressure."

***** June 25 had lower volume than the day before but it was still substantial (14% above average) and therefore counts to make Monday a Major Distribution day.**

Distribution days drop off the 20-day count for 2 reasons. The Index or stock:

- (1) **TIMES OUT:** the distribution day is 21 days old or older
- (2) **CLIMBS OUT:** The index rises 5% or more above the close of the distribution day

FOR INVESTORS IN INDIVIDUAL STOCKS

More detailed comments on market direction and technical analysis for individual stocks

FRIDAY

THE GOOD NEWS: Both the Nasdaq and the S&P500 have found support on the 50-day moving averages. The Nasdaq is only 1.5% below its all-time high in June 20 high (just 2 ½ weeks ago). This dip is quickly close to becoming “just a memory!”

THE QUESTION: Will the market continue to rise to new highs?

The market did show clear support at the 50-day moving average line with the Nasdaq and S&P500 bouncing back above them this week.

But oil housing and transportation sectors are lagging.

THE MARKET CONTINUES IN THE DIRECTION IT IS GOING, UNTIL IT DOES'T.

You might ask me which direction is the market going right now? That's easy: look at the top of this newsletter (and all the yellow bands) to know that the market direction is:

THE UPTREND IS UNDER PRESSURE

And that is still Uptrend.

Are you are local to Dallas-Fort Worth area? I invite you to attend one of my weekly classes which look at market direction then focuses on finding, holding and selling Individual stocks for maximum return.

Every day at www.investors.com, Investor's Business Daily has great ideas (for subscribers). Here are two daily articles not to be missed: **Please do NOT buy these stocks just because they are highlighted. You must do your own research and see a buy signals like a base breakout or add-on buy signal.**

On the INVESTORS.COM website, click on the RESEARCH tab, then look for:

IBD STOCKS OF THE DAY – read the full IBD "Stock of the Day" articles (through your IBD subscription)

- Friday 7/6: Wing stop (WING) 5% below the 55.85 buy point in a flat base.
- Thursday 7/5: Dollar General (DG) just 2.5% below its buy price (101.18 pivot at the top of the handle).
- Tuesday 7/3: TransUnion (TRU) broke out of a 3-Friday's tight buy signal.
- Monday 7/2: Home Depot (HD) nears buy point. Don't underestimate the power of the "big boys." Sometimes, the large, old companies may not take off like a sexy, nimble new IPO, but can look like a steamroller as they just keep rising.

INVESTING ACTION PLAN (a wide reaching discussion of stocks set to move the next day)

I have a new investing mantra I hope you'll use as a reminder of how to manage your portfolio:

Buy the BEST
Watch the NEST
Visit the REST

1. **Buy the BEST** – self-explanatory: Do not compromise your stock picking or your signal to buy.
2. **Watch the NEST** – Once I own a stock, my relationship to it completely changes. It's "my" stock now. Take care of your chicks. Feed them as they grow (even add more). But if you discover your cute cuddly chick is weak or fighting you, it may be time to pass them on to a new caretaker.
3. **Visit the REST** – What about all those other stocks you identified as "almost" ready buy? A secret I don't talk about: I have two watch lists. One I look at daily with stocks very near buy points or waiting for EPS announcement. And a second weekly list of stocks that are getting close to a buy signal.

Prior Notes that are Still Relevant:

The key to this volatile market is to only buy the top stocks that match your investing criteria. Track each stock's performance carefully – every day if possible.

If you take a MarketSmith trial, please mention the Dallas and Fort Worth Meetup leader (Charlotte Hudgin) as your source. This helps us get occasional guest speakers from IBD and access to MarketSmith! Thank you.

I AM WAITING TO BUY INDIVIDUAL STOCKS which are breaking out of good bases with high volume on the breakout day. Volume is the factor which is hard to find right now but I can wait! With the current weakness in the market, I am buying smaller first bites. If you are having trouble finding enough good stocks to buy, consider adding the QQQ or another Uptrend-Index ETF. This is one place I put some of my money when I can't find the right stock at a buy point.

Remember: **CASH IS A POSITION.**

**The market diagnosis is
UPTREND under PRESSURE.**

**REMEMBER:
YOU ARE NOT SMARTER THAN THE MARKET**

**THE MARKET AND STOCKS CONTINUE IN THE DIRECTION THEY
ARE GOING..... UNTIL THEY DON'T.**

PROTECT YOUR PORTFOLIO WITH AN 8% STOP

CHOOSE YOUR STOP & LIVE BY IT – NO EXCUSES!

And you don't have to wait for your stock to fall to the stop. A concentration of distribution days is always a reason for me to get out wherever it happens!

What to do now:

1. **WATCH YOUR INVESTMENTS CLOSELY:** Add positions in top stocks at buy or add-on points. Sell stalling and falling stocks quickly.
2. Do a quick **review of each stock you own every night.** Look for strength and weakness signals in the price-volume action, especially watching for distribution (signs of institutional selling)
3. **DON'T LOSE YOUR GAINS:** Sell any stock that is showing a concentration of distribution days. I sell more quickly in a Downtrend

EXPLANATION OF TERMS FOR THE

MARKET ACTION OVER THE LAST 20 DAYS

Four weeks of price and volume action reveal much about the direction of the market and the strength of that movement.

		Price		Volume	
Healthy Uptrend Price-Volume Movement	Strong Action	Up	↑	↑	Up
	Weaker Action	Down	↓	↓	Down
Healthy Downtrend Price-Volume- Movement	Strong Action	Down	↓	↑	Up
	Weaker Action	Up	↑	↓	Down

The chart below identifies the **market direction** indicated by the Nasdaq's price and volume action for the last 20 days at two levels of significance.

ACCUMULATION/DISTRIBUTION COLUMN - TELLS YOU WHERE THE BIG MONEY IS GOING

The listing includes: the date, Nasdaq closing price and percent change of the Nasdaq price and volume.

- The next column identifies days that were **Major Accumulation** (serious UPTREND indicator) or **Major Distribution** (serious Downtrend indicator) using the 1% minimum rise or fall with higher volume.
- **Minor accumulation** and **minor distribution days** are also identified – days that moved 0.2% or more but less than 1%.

“CONSISTENT WITH” – THE SUBTLE, BUT TELLING MOVES

The last column is an UPTREND /Downtrend indicator.

Think of a healthy Uptrend. It will have many days where the index rises with increased volume.

But even in the most robust Uptrend, * not every day will be up. In any Uptrend, there will be some down days. If they have higher volume, then the day becomes a distribution day but if the volume is lighter (as frequently happens in an Uptrend), then the down day is NOT a distribution day. In fact, a drop on lighter 4747.62 volume says they market is NOT selling off heavily – good news and consistent with the Uptrend.

Using the Healthy UPTREND/Downtrend price and volume movement listed above.

- For example, if the Nasdaq closing price rose 0.7% and the volume rose 2% (up and up), that movement is “consistent with” the price-volume action of a Healthy UPTREND.
- If the price drops 0.5% and the volume rises 1.2% (down and up), that movement is “consistent with” the price-volume action of a Healthy Downtrend as indicated in the table above.
- Any index change less than + or – 0.2% or volume change less than + or – 1% has no “consistent with” notation. Price and volume movements that small is not strong enough to tell us about the market movement.

EXAMPLE OF ACCUMULATION AND DISTRIBUTION WITH EXPANDED EXPLANATION OF TERMS:

Today's Market Action with explanation						
2/5/16	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg	Accumulation or Distribution Day?	Current Trend: DOWNTREND Began 1/4/2015
Index	4363.14	-3.2%	+13.8%	+21.8%	Major Distribution	+11.3%
S&P500	1879.92	-1.9%	NYSE Volume		Neither	+6.6%
NYSE	9,390.33	-1.5%	-5.3%	+15.0%	Neither	+6.2%
DJIA	16,204.62	-1.3%			Neither	+5.5%

A **Major Accumulation Day**: Price RISES 1.0% or more and higher Volume than the day before
A **Minor accumulation Day**: Price RISES 0.2% or more and Volume is strong (either higher volume or is well-above average volume)

A **Major Distribution Day**: Price FALLS 1.0% or more and higher Volume than the day before.
A **Minor distribution Day**: Price FALLS 0.2% or more, Volume is strong (either higher volume or is well-above average volume)

A **Stalling minor distribution Day**: Only in an up-trending index or stock, price is FLAT or DOWN slightly compared to the day before, closing in the bottom half of the day's range and volume is heavier or about equal to the day before or strong compared to the past market. It's the price closing low in the day's range after an uptrend that is the key for this designation. Price close to flat and higher or consistent volume indicates the big money (institutions: mutual funds, banks, etc.) are gently selling, trying to sneak out so you won't notice.

** The "CURRENT TREND" column calculates how far each index has moved in the current trend assuming you purchased the index (which is not buyable) at the opening price on the day after the trend change signal.

- **When this column is GREEN, the index has moved in the direction of the market trend.**
- **HOWEVER, when this column is RED, the index change has fallen into negative territory (which could be a rise during a Downtrend)**

An **ACCUMULATION** day points at heavy buying by institutional money managers - the mutual funds, pension funds, banks, etc.
A **DISTRIBUTION** day points at heavy selling by institutional money managers.
