11/7/2018 Market moves into UPTREND. Sell short ETFs. Buy Long. ETFs and/or stocks.

**The major indexes, the Nasdaq and S&P500, rose 2.6% and 2.2% respectively.**

Volume was oddly low during the middle of the day. I was afraid we would have to wait another day.

**But by the end of the day, both major indexes had achieved volume higher than yesterday AND higher than the average volume.**

A rise more than 1.3% with volume higher than the day before makes Wednesday >>>> **a Follow-Through day .**

It was a good day in the market for the start of a **new UPTREND!**

More later tonight.

Wishing you , "Many happy returns,"  
Charlotte Hudgin
