The ARMCHAIR INVESTOR STRATEGY

Here's how to earn these extraordinary returns:

- **When the Market direction moves into UPTREND:**
 - Sell the DOWNTREND ETF and **Buy an UPTREND ETF**
- **When the Market direction moves into DOWNTREND:**
 - Sell the UPTREND ETF and **Buy a DOWNTREND ETF**
- **Repeat!!**

ARMCHAIR INVESTOR TREND-FOLLOWING ACTION

With the market diagnosis as "Uptrend", you have one Trend-following action:

Hold an Uptrend ETF such as the QQQ, QLD and TQQQ to take advantage of the rising market.

WEDNESDAY: Nasdaq opens with a powerful statement: a gap up that kept going to close at an all-time new high.

- As is common, the Nasdaq is leading the Uptrend. The other major index, the S&P500, has risen for over two months but is still below its January all-time high.
- **The Uptrend is healthy.** In this morning's Armchair Investor class in Dallas, the class members prepared a market analysis on 9 key market factors. (You see many of them later in this newsletter.)
 - EVERY ONE OF THE NINE FACTORS WEIGHED IN AS "CONSISTENT WITH" AN UPTREND. The score was:

UPTREND 9 pointsversus..... DOWNTREND zero points
- **"Leader Up/Down Ratio" is a strong 1.7!** This ratio is the count of leader stocks that rose with higher volume each day versus leader stocks the fell with higher volume in the last 10 trading days. The high ratio says:
 - Leader stocks (strong financials with high RS rating) are continuing to rise – i.e. it should be easy to find winners to watch and buy!

The market remains in healthy UPTREND.

Both 20-day distribution days are moderate:

- The S&P500 has 4 distribution days
- The Nasdaq has 4 distribution days

LOTS OF GREEN ON “**MARKET FACTORS, COUNTS AND RATINGS**” TABLE: Yeah!
See this table in the FULL newsletter (link at top of this newsletter).

Then click on [CURRENT NEWSLETTER](#).

Some individual stocks have caught the Uptrend fever. They have price AND volume. I am buying full positions (through pyramiding in), of top stocks with strong breakouts.

REMEMBER:

**THE MARKET CONTINUES IN THE DIRECTION IT'S GOING
UNTIL IT DOESN'T.**

THE ARMCHAIR INVESTOR strategy is SIMPLE and FAST to execute:

- **Be in the market when it is going up.**
- **Be out or (or short) the market when it is going down.**
- **Protect yourself with an 8% stop.**

No advice is ever given in this newsletter. It is provided for your education only.

FOR INVESTORS IN INDIVIDUAL STOCKS

More detailed comments on market direction and technical analysis for individual stocks

WEDNESDAY I am not updating most of this section of the newsletter this week as I work on redesigning this newsletter to focus more on market direction and the Armchair Investor Trend-following strategy.

I invite those of you who are local to visit one of my weekly classes which look at market direction then focuses on finding, holding and selling Individual stocks for maximum return.

Every day at www.investors.com, Investor's Business Daily has great ideas. Here are two daily articles not to be missed:

On the INVESTORS.COM website, click on the RESEARCH tab, then look for:

1. RECENT IBD STOCKS OF THE DAY

- Wednesday 6/20 **PYPL** PayPal
- Tuesday 6/19: **ORBK** Orbotech
- Monday 6/18: **FLT** FleetCor Technologies
- Friday 6/15: **PYPL** PayPal
- Thursday 6/14: **DBX** Dropbox – I hope you bought it!,

Find a new stock of the day, plus other lists like “Stocks Breaking Out Today” with a basic subscription to Investors.com

2. INVESTING ACTION PLAN (a wide reaching discussion of stocks set to move the next day)

I have a new investing mantra I hope you'll use as a reminder of how to manage your portfolio:

Buy the BEST
Watch the NEST
Visit the REST

1. **Buy the BEST** – self-explanatory: Do not compromise your stock picking or your signal to buy.
2. **Watch the NEST** – Once I own a stock, my relationship to it completely changes. It's "my" stock now. Take care of your chicks. Feed them as they grow (even add more). But if you discover your cute cuddly chick is weak or fighting you, it may be time to pass them on to a new caretaker.
3. **Visit the REST** – What about all those other stocks you identified as "almost" ready buy? A secret I don't talk about: I have two watch lists. One I look at daily with stocks very near buy points or waiting for EPS announcement. And a second weekly list of stocks that are getting close to a buy signal.

Prior Notes that are Still Relevant:

The key to this volatile market is to only buy the top stocks that match your investing criteria. Track each stock's performance carefully – every day if possible.

Even though the percent of stocks with A and B accumulation/distribution ratings is up, it can still be hard to find a good stock breaking out of a strong base. Be sure to only buy the best stocks at the right buy signal.

There are several stocks breaking out of good bases or in buy zones. Using Investors.com's **MarketSmith** is the fastest way I know to find these stocks. Each week, the MarketSmith team puts all their screens together (the IBD 50, Week in Review, Top Big Cap stock, plus dozens more) and create one list of top stocks – **the MarketSmith250**. This is the list the O'Neil portfolio managers are sent home with each weekend. Now you and I can get that same list to study.

From that list, are other automated lists in MarketSmith such as:

- "stocks breaking out today",
- "stocks near buy points", and
- "recent breakouts".

These lists are updated in real time during the week! I am always excited to see the stock breaking out today list! It is my first, go to list! If interested, you can take a low cost trial of MarketSmith and get live coaching on how to use it. After hours, their videos about how to use MS are excellent!

If you take a MarketSmith trial, please mention the Dallas and Fort Worth Meetup leader (Charlotte Hudgin) as your source. This helps us get occasional guest speakers from IBD and access to MarketSmith! Thank you.

I AM STILL CAREFULLY BUYING INDIVIDUAL STOCKS which are breaking out of good bases with high volume on the breakout day. Volume is the factor which is hard to find right now but I can wait! With the current weakness in the market, I am buying smaller first bites. If you are having trouble finding enough good stocks to buy, consider adding the QQQ or another Uptrend-Index ETF. This is one place I put some of my money when I can't find the right stock at a buy point.

Remember: **CASH IS A POSITION.**

The market diagnosis is UPTREND.

**REMEMBER:
YOU ARE NOT SMARTER THAN THE MARKET**

THE MARKET AND STOCKS CONTINUE IN THE DIRECTION THEY ARE GOING..... UNTIL THEY DON'T.

PROTECT YOUR PORTFOLIO WITH AN 8% STOP

CHOOSE YOUR STOP & LIVE BY IT – NO EXCUSES!

And you don't have to wait for your stock to fall to the stop. A concentration of distribution days is always a reason for me to get out wherever it happens!

What to do now:

1. **WATCH YOUR INVESTMENTS CLOSELY:** Add positions in top stocks at buy or add-on points. Sell stalling and falling stocks quickly.
2. Do a quick **review of each stock you own every night.** Look for strength and weakness signals in the price-volume action, especially watching for distribution (signs of institutional selling)
3. **DON'T LOSE YOUR GAINS:** Sell any stock that is showing a concentration of distribution days. I sell more quickly in a Downtrend

EXPLANATION OF TERMS FOR THE

MARKET ACTION OVER THE LAST 20 DAYS

Four weeks of price and volume action reveal much about the direction of the market and the strength of that movement.

		Price		Volume	
Healthy <u>Uptrend</u> Price-Volume Movement	Strong Action	Up	↑	↑	Up
	Weaker Action	Down	↓	↓	Down
Healthy <u>Downtrend</u> Price-Volume- Movement	Strong Action	Down	↓	↑	Up
	Weaker Action	Up	↑	↓	Down

The chart below identifies the **market direction** indicated by the Nasdaq's price and volume action for the last 20 days at two levels of significance.

ACCUMULATION/DISTRIBUTION COLUMN - TELLS YOU WHERE THE BIG MONEY IS GOING

The listing includes: the date, Nasdaq closing price and percent change of the Nasdaq price and volume.

- The next column identifies days that were **Major Accumulation** (serious UPTREND indicator) or **Major Distribution** (serious Downtrend indicator) using the 1% minimum rise or fall with higher volume.
- **Minor accumulation** and **minor distribution days** are also identified – days that moved 0.2% or more but less than 1%.

“CONSISTENT WITH” – THE SUBTLE, BUT TELLING MOVES

The last column is an UPTREND /Downtrend indicator.

Think of a healthy Uptrend. It will have many days where the index rises with increased volume.

But even in the most robust Uptrend, * not every day will be up. In any Uptrend, there will be some down days. If they have higher volume, then the day becomes a distribution day but if the volume is lighter (as frequently happens in an Uptrend), then the down day is NOT a distribution day. In fact, a drop on lighter 4747.62 volume says they market is NOT selling off heavily – good news and consistent with the Uptrend.

Using the Healthy UPTREND/Downtrend price and volume movement listed above.

- For example, if the Nasdaq closing price rose 0.7% and the volume rose 2% (up and up), that movement is “consistent with” the price-volume action of a Healthy UPTREND.
- If the price drops 0.5% and the volume rises 1.2% (down and up), that movement is “consistent with” the price-volume action of a Healthy Downtrend as indicated in the table above.
- Any index change less than + or – 0.2% or volume change less than + or – 1% has no “consistent with” notation. Price and volume movements that small is not strong

enough to tell us about the market movement.

EXAMPLE OF ACCUMULATION AND DISTRIBUTION WITH EXPANDED EXPLANATION OF TERMS:

Today's Market Action with explanation						
2/5/16	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg	Accumulation or Distribution Day?	Current Trend: DOWNTREND Began 1/4/2015
Index	4363.14	-3.2%	+13.8%	+21.8%	Major Distribution	+11.3%
S&P500	1879.92	-1.9%	NYSE Volume		Neither	+6.6%
NYSE	9,390.33	-1.5%	-5.3%	+15.0%	Neither	+6.2%
DJIA	16,204.62	-1.3%			Neither	+5.5%

A **Major Accumulation Day**: Price RISES 1.0% or more and higher Volume than the day before
A **Minor accumulation Day**: Price RISES 0.2% or more and Volume is strong (either higher volume or is well-above average volume)

A **Major Distribution Day**: Price FALLS 1.0% or more and higher Volume than the day before.
A **Minor distribution Day**: Price FALLS 0.2% or more, Volume is strong (either higher volume or is well-above average volume)

A **Stalling minor distribution Day**: Only in an up-trending index or stock, price is FLAT or DOWN slightly compared to the day before, closing in the bottom half of the day's range and volume is heavier or about equal to the day before or strong compared to the past market. It's the price closing low in the day's range after an uptrend that is the key for this designation. Price close to flat and higher or consistent volume indicates the big money (institutions: mutual funds, banks, etc.) are gently selling, trying to sneak out so you won't notice.

** The "CURRENT TREND" column calculates how far each index has moved in the current trend assuming you purchased the index (which is not buyable) at the opening price on the day after the trend change signal.

- **When this column is GREEN, the index has moved in the direction of the market trend.**
- **HOWEVER, when this column is RED, the index change has fallen into negative territory (which could be a rise during a Downtrend)**

An **ACCUMULATION** day points at heavy buying by institutional money managers - the mutual funds, pension funds, banks, etc.
A **DISTRIBUTION** day points at heavy selling by institutional money managers.
