

9/29/2020 >>> **DOWNTREND** Nasdaq and S&P500 sit on their 50-day moving avg lines. Both major indexes have "E" Accumulation/Distribution ratings (being heavily sold)

ARMCHAIR INVESTOR – THE MARKET’S MESSAGE **NEWSLETTER**

A FACT-BASED, TREND-FOLLOWING STRATEGY

3 Armchair Classes this week: Monday 7 p.m., Tuesday 2:30 p.m. Wednesday 10 a.m.
[Click Here: Join us for 2 weeks as my guest \(free\) Prior registration ensures you a seat.](#)

CURRENT MARKET DIRECTION: DOWNTREND.

Armchair Investor Trend-following Investment Position:	Hold PSQ (an ETF that <u>rises</u> in a falling market)
Armchair Investor 2020 Returns See trades on page 2	+45.6% year-to-date In only 6 trades! (see page 2)

THE MARKET’S MESSAGE: The Nasdaq and S&P500 continue to hold at their 50-day moving average lines..... and stayed there all day Tuesday.

How will the markets react Wednesday morning to the presidential debates? (the pre-market ETFs are down less than 1.2% as at 6:50 a.m.)

And there has been some **serious selling going on!** The percent of stocks with A or B Accumulation ratings (i.e. stocks being bought) tumbled from 63% to 37% over the last 4 weeks! (with a slight rise to 41% Tuesday)

- See the **PROGRESS IN ACCUMULATION/DISTRIBUTION RATINGS** table, page 2.

I don't remember a faster fall! That kind of drop can only happen with broad selling in the market! The market did rise on Monday, but lighter volume took away that day's power.

I hold the PSQ, an inverse ETF designed to rise 1% for each 1% the QQQ falls. This is one way to capture gains in a falling market. And yes, when the market rises, the PSQ loses money. When a stock or index rises without higher volume, it is showing a lack of institutional support for the rise!

WATCH YOUR STOCKS! They may have gotten too high! **Count the distribution days.** See the "SELLING" chapter IN YOUR "How to Make Money in Stocks" book (either IBD founder William O'Neil or Matthew Galgani's version.)

DAILY MARKET ACTION						
9/29/20	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Index GAIN from 9/21 New Downtrend
Nasdaq	11085.25	-0.3%	-4.0%	-13.9%	Neither	+4.4%
S&P500	3335.47	-0.5%	-11.1%	-14.0%	Neither	+2.1%
DJIA	27452.66	-0.5%	-11.1%	-14.0%	Neither	+1.0%

The Armchair Investor Strategy Earns Extraordinary Returns for 2020

And you could have earned this same return if you just followed this nightly newsletter.

ARMCHAIR INVESTOR TREND-FOLLOWING RETURNS							
All Trades In 2020							
Market Direction Signal Change		Direction	Action	# Days	Price	% GAIN Each Trend (See note)	Armchair Investor GAIN In 2020
Trades	12/31/19	Uptrend	Hold the QQQ	55	\$212.61	+4.3%	+4.3%
1	2/24/20	Uptrend under Pressure	Sold QQQ at Open Wait in CASH	3	\$221.84	+0.0%	+4.3%
2	2/27/20	Downtrend	Bot PSQ at Open	38	\$24.65	+5.6%	+10.2%
3	4/6/20	Uptrend	Sold PSQ at Open Wait in CASH	2	\$26.03	+0.0%	+10.2%
4	4/8/20	Uptrend	Bot QQQ at Open	155	\$198.08	+39.1%	+53.3%
5	9/9/20	Uptrend under Pressure	Sold QQQ at Open Wait in Cash	9	\$275.54	+0.0%	+53.3%
6	9/18/20	Downtrend	Bot PSQ at Open		\$17.55	+0.0%	
	9/29/20	Downtrend	Hold PSQ	12	\$16.67	-5.0%	+45.6%
						TOTAL Growth in 2020 :	+45.6%

WARNING: The crashing of the count of A plus B rated stocks from 51% to 36% in just one week (see red outlined box below) is an indication of serious money exiting the market (e.g. widespread selling).

PROGRESS IN ACCUMULATION/DISTRIBUTION RATINGS							
		A	B	C	D	E	As + Bs
4 weeks ago	8/31	13%	51%	20%	12%	3%	65%
3 weeks ago	9/8	8%	47%	26%	16%	3%	55%

	# stocks in each rating:	360	2269	1686	1703	461	

Watch how I draw support and resistance lines on the major indexes. See those lines on the Nasdaq and S&P500 charts on pages 18 and 19 of this report.

MARKET FACTORS, COUNTS & RATINGS		9/29/2020	
Type of Day for <u>Nasdaq Index</u> Accumulation, Distribution or Neither		Neither	
I track the <u>Nasdaq's</u> price-volume because it usually leads the market direction.			
Market Direction Uptrend, Under Pressure, Downtrend		Downtrend	
<u>Nasdaq Accumulation & Distribution Days (last 20 days)</u> Only accumulation and distribution days <u>since the last market direction change</u> are in this count.		Accumulation Days 3	Distribution Days 5
Count of Up Days and Down Days Nasdaq's last <u>10-days'</u> price movement		Up Days 4	Down Days 5
Only days that move at least + or - 0.2% are included in the Up/Down count which does not always, therefore, add up to 10 days.			
Rising/Falling Ratio of Leader Stocks with High Volume Nasdaq 10-day ratio		2.0	
This indicator looks at the HEALTH of leading stocks (high RS rating) with strong financials (high EPS rating). Uptrend indicator: 1.5 or higher. Neutral: 1.0 to 1.49. Downtrend: less than 1.0			
Market Accumulation/Distribution Ratings "A": heavy accumulation, "B": moderate accumulation, "C": neutral, "D": moderate distribution, "E": heavy distribution. Accumulation = Institutions are BUYING, Distribution = Inst are SELLING		Nasdaq E	E
		S&P 500 E	E
		DJIA E	E
Are Major Indexes Above or Below Moving Averages? "At" is within 1% above or below the moving average.		50-Day	200-Day
Nasdaq		At	Above
S&P 500		At	Above
NYSE		Below	Above
DJIA		At	Above

Note the HUGE weakness shown in the last 9 days: 3 Major Distribution days, 7 days “consistent with” a Downtrend, and NO accumulation days!

MARKET ACTION (Nasdaq) OVER THE LAST 20 DAYS

(For a full explanation of the terms used in this table see end of this newsletter)

#	Date	Close	Index % Change	Volume % Change	Current Trend Day Count *	Type of Day: Accumulation, Distribution or Neither (—)	CONSISTENT WITH: UPTREND OR DOWNTREND?
20	9/1/20	11939.67	+1.4%	-2.2%	106	—	DOWNTREND
19	9/2/20	12056.44	+1.0%	+4.2%	107	Major Accumulation	UPTREND
18	9/3/20	11458.10	-5.0%	+22.2%	108	Major Distribution	DOWNTREND

15	9/9/20	11141.56	+2.7%	-9.7%	111	—	DOWNTREND
14	9/10/20	10919.59	-2.0%	+8.8%	112	Major Distribution	DOWNTREND
13	9/11/20	10853.54	-0.6%	-5.7%	113	—	UPTREND
12	9/14/20	11056.65	+1.9%	+3.2%	114	Major Accumulation	UPTREND
11	9/15/20	11190.32	+1.2%	+1.6%	115	Major Accumulation	UPTREND
10	9/16/20	11050.47	-1.3%	-3.1%	116	—	UPTREND
9	9/17/20	10910.28	-1.3%	+1.0%	117	Major Distribution	DOWNTREND
8	9/18/20	10793.28	-1.1%	+48.2%	1	Major Distribution	DOWNTREND
7	9/21/20	10778.80	-0.1%	-29.9%	2	—	—
6	9/22/20	10963.64	+1.1%	-11.5%	3	—	DOWNTREND
5	9/23/20	10632.98	-3.0%	+17.2%	4	Major Distribution	DOWNTREND
4	9/24/20	10672.27	+0.4%	-0.9%	5	—	DOWNTREND
3	9/25/20	10913.56	+2.3%	-5.8%	6	—	DOWNTREND
2	9/28/20	11117.52	+1.9%	-5.8%	7	—	DOWNTREND
1	9/29/20	11085.25	-0.3%	-4.0%	8	—	UPTREND

* NOTE: The color of the “Current Trend Day Count” column indicates the market direction: Green = Uptrend, Yellow = Uptrend under Pressure, Red = Downtrend (correction).

Current Signs of Market Weakness

- Market diagnosis is **DOWNTREND** (also known as “correction”).
- The percent of stocks with strong A and B ratings recently crashed from 63% to 37% OVER THE 4 WEEKS showing consistent, widespread selling.
 - The Nasdaq, S&P500 and DJIA indexes have “E” (heavy selling) ratings.
- The Nasdaq has shown ONE day (9/29) of positive “price-volume” action in the last 9 trading days:
 - 3 days were Major Distribution days – the index dropped 1+% on higher volume indicating major selling days.
 - 7 of the 9 days were “consistent with” a Downtrend. These days were either distribution days (the 3 days mentioned above) or rising days without rising volume
 - One day had an insignificant price movement of -0.1%, a neutral day.
 - One day (9/29) was “consistent with” an Uptrend.
- With this serious amount of weakness, you should review each of your stocks carefully for sell signals. Hold the strong ones; consider selling those showing weakness.

Current Signs of Market Strength

- The Nasdaq and S&P500 are sitting “at” (within 1%) of their 50-day moving average lines (but the volume was lower or below average for those 2 days, taking much of the power out of those rises!)
- The Nasdaq volume finally is settling down – (but still much above “pre-Corona correction” days in early February. The unusually high volume added a level of uncertainty to the market.)
- >>>The ratio of Leader stocks RISING versus FALLING is holding at a strong 2.0. This high ratio is almost impossible to believe. With the accumulation/distribution having follow very fast to a dismal “E” (heavy selling) for all three indexes, I wonder where the 2-to-1 winners are coming from. The Leader list is a secret, so we will never know.
 - A ratio over 1.5 is a strong indicator for upward action in the near term. A rating below 1.5 indicates an uncertain Uptrend OR a rotation away from exhausted, out of favor leader stocks as new leaders emerge. (A rating below 1.0 is weak.)

THE NASDAQ UPWARD AND DOWNWARD CHANNELS

One of the features I like about **Investors.com's MarketSmith charts** is that I can draw in my own channel lines.

Below is the Nasdaq chart for 2020. It shows:

- the January+ Uptrend that continued in the beginning of the year,
- The pink downtrend as the market crashed in February-March
- The amazing 5-month rise (Uptrend) of the market since March low.

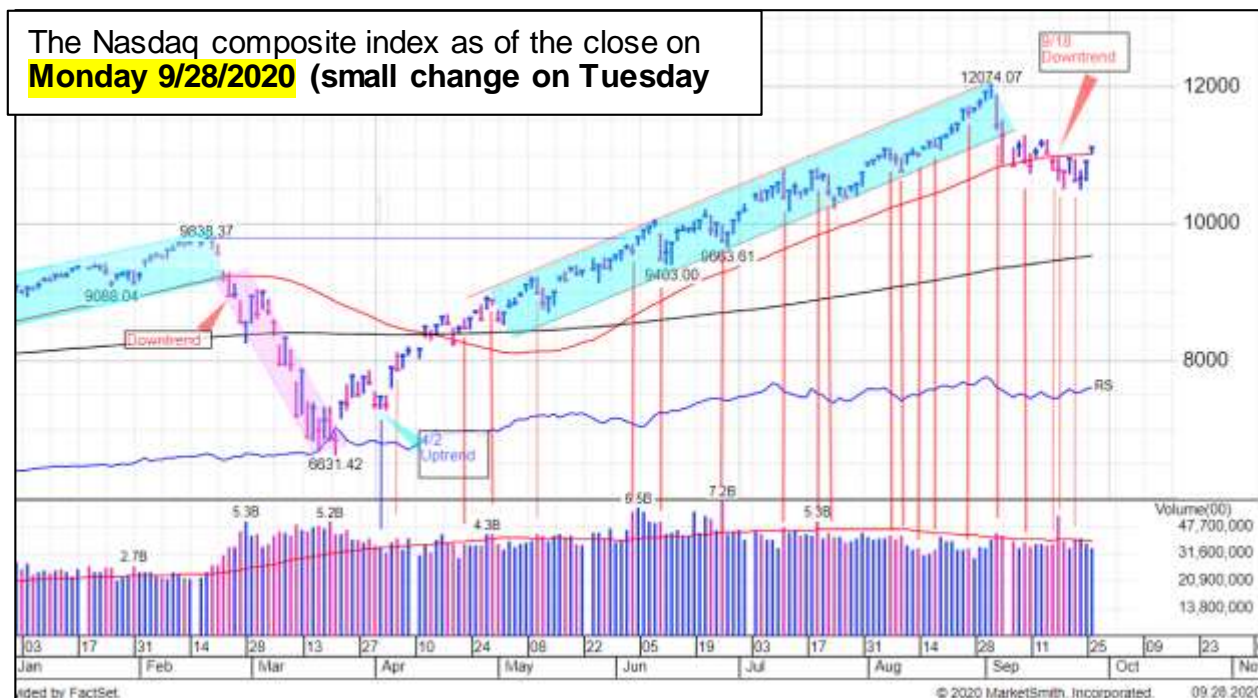

Did you know annotations stay on the MarketSmith charts! Bravo to the designers. My notations will stay on the MarketSmith charts for years! I can go back and visit how I saw the market in 2000, 2008, 2015-16, etc.

That is one of MarketSmith's many truly unique and valuable features! I don't have to figure out what happened in those past periods again

. My annotations are there! Updated, Friday 9/25/2020. Vertical red lines identify distribution days (down days with higher volume indicating serious selling.)

>>>> I HIGHLY RECOMMEND MarketSmith for your investing CHARTS! Note the excellent annotations and markups I have added on the chart below.

Go to MarketSmith.com to try it out. All my distribution day notations (pink vertical lines) will be visible for years! I recently went back to the 2000 high. Yes – annotations were there!

DO YOU MAKE THESE INVESTING MISTAKES?

- Do you miss buying a great stock at the price you knew was right?
- Do you sell too early and watch it continue to rise without you?
- Or do you hold on too long and lose the gains you just had?

Learn how to analyze your stocks for effective buy and sell signals.

COMPARISON of the NASDAQ, S&P500 and DJIA Growth

The chart below shows the returns of the **Nasdaq, the S&P500 and the DJIA** from 12/31/2019 through 9/28/2020. Where should you go shopping? The answer for me? Nasdaq! And, yes! I will buy a top stock wherever I find it!

These results are why I focus on the Nasdaq and QQQ for my trend-following strategy:

REMEMBER: BUY & HOLD IS NOT A STRONG INVESTING STRATEGY.

Imagine the difference in returns if you could just wait in cash as the market falls and get back in as it starts back up!

- It isn't necessary to get in at the bottom or out at the top!
- Just stepping out of the market somewhere *near the top* and getting back in *near the bottom* has had a HUGE IMPACT on my portfolio.

It can take YEARS to complete a market Downtrend (correction) then recover back to where you were.

An EXAMPLE OF WHY BUY-AND-HOLD” COSTS YOU BIG BUCKS.

- Over the last year, a “buy and hold” strategy has earned 10.4% for the S&P500. “Buy and hold” worked better for the Nasdaq earning 31.9%. But wait...
- **If you invested with the Armchair Investor strategy, you are UP 45%.** (see page 2 for the exact current Armchair Investor Strategy returns)
- Where do you want your money invested? Here's where you should say: **“The Armchair Investor strategy!”**

One last note: IF you invest in individual stocks, the best can be found on any index. Be sure to find the stocks with best ratings, base action and breakouts.

MARKET/CHART READING LESSON:

The MarketSmith Relative Strength Line – My favorite!

Go to any chart on the Investors.com web page. You will see the bumpy line labeled RS for Relative Strength. This line moves up or down with each price bar showing if this stock or index rose more or less than the S&P500.

Look at the Nasdaq daily chart (0NDQC) and notice that the RS line has risen since the Oct 2019 low, indicating it has earned higher returns.

Go to the monthly chart and note that the S&P500 has consistently outperformed the S&P500. (not ever month but most). The S&P500 does have some great stocks. That rising RS line tells us that, over time, the Nasdaq as a whole has done better than the S&P500. But just like shopping for groceries, I will buy from the market that has the best fruit, on any given day.

The Nasdaq continues to outperform the S&P500. Watch the RS line on Investors.com charts. This important line shows you how a stock or index is performing compared to the S&P500. A rising line indicates that stock or index has risen faster than the S&P500 (measured in percentage change.)

Note: Do not confuse IBD's RS line with the RSI line some charting system use. The RS measures how a stock is moving compared to the S&P500. Rising faster gives a higher rating. *Investopedia.com states: The relative strength index (RSI) is a momentum indicator that measures the magnitude of recent price changes to evaluate "overbought" or "oversold" conditions in the price of a stock or other asset.*

The problem I have found with the RSI line is that some of the best, rising stocks can push an RSI line to the top of the rating (indicating overbought) just when I have a buy signal. As always, I tell you to use the indicators you find useful (profitable).

I am excited about the settling down in market volume. But I continue to be concerned about the sustained day-to-day price volatility. It is surely affected by the uncertainty of the upcoming earnings announcements. BE SURE YOUR STOPS ARE IN PLACE.

Every Day's Lesson: Whether you agree with your stock's daily results or not...

- **YOUR JOB is to monitor its daily results and adjust your action accordingly.**
 - **Monday: Monitor.....and.....adjust.**
 - **Tuesday: Monitor.....and.....adjust.**
 - **Wednesday: Monitor.....and.....adjust.**
 - **Thursday: Monitor.....and.....adjust.**
 - **Friday: Monitor.....and.....adjust.**
 - **(repeat)**

KEY MARKET CONCEPTS APPLIED TO TODAY

THE GOOD NEWS: The market continues in the direction it is going until it doesn't. This market is in confirmed Uptrend.

THE BAD NEWS: Almost none! With the Uptrend so strong, I have nothing to complain about except the annoying Wall Street fear mongers who want to scare you out of your stocks because they want to buy at today's low prices before they get even higher!

UNDERSTANDING THE "CONSISTENT WITH" COLUMN in the "MARKET ACTION (Nasdaq) OVER THE LAST 20 DAYS" TABLE

If the horse you are riding, dies. GET OFF!

When the market (or your stock) dies – whether that is in a year, a month or tomorrow, the Armchair Investor Strategy will NOT “stay the course” and we won't ride a falling market down. Instead, we will use our 20 years of market direction experience to identify optimum times to be in the market and times to be out of the market. (not guaranties!) (PS I love horses. They are amazing companions.)

Using my day-to-day price-volume analysis, my students and I have consistently been able to make money by:

“Getting IN near the bottom” and “Getting OUT near the top.”

The Armchair Investor strategy has allowed me to earn well-above-average returns since the 2000 top! See page 2 for this year's exciting wins!

HOW CLOSE ARE THE INDICES TO ALL-TIME HIGHS?				
9/29/2020	Nasdaq	S&P500	NYSE	DJIA
Date of Index All-time High*	9/2/2020	9/2/2020	1/17/2020	2/12/2020
All-time High	12074.76	3588.11	14183.26	29568.27
Closing Price	11085.25	3335.47	12602.64	27452.66
Below (-) or Above (+) Recent High (%)	-8.2%	-7.0%	-11.1%	-7.2%
<p>*New Highs are daily intraday prices and are noted in green for a week, even if the price drops lower. The highest closing price in history of the index is shown in green for that day.</p>				

Prepare yourself for a NEW ECONOMY!

I expect a major shift in how we do business: more online appointments, more working from home, reduced business travel (with reduced costs to businesses) We might actually see this lockdown period as **a slingshot into the a new, sleeker way of conducting business. And each of those new trends will help some business (online meetings, internet providers, online schools, casual clothing, healthy ready-to-eat food...)**
>>>>>>>> I would like to hear your ideas of where the big gains will occur!

Which industry groups and specific companies will thrive and which will dive in the after pandemic new economy???

WILL HISTORY REPEAT ITSELF? In the financial crisis of 2007, it took the market 2 1/2 years to recover the 56% drop. Worse yet was the reaction to the dot.com 90's market over-inflation that crashed in March of 2000 and took 19 years for the market to "break even."

WHAT CAN WE (INDIVIDUAL INVESTORS) DO NOW? ONE lesson I have learned from every greatest investor I have studied:

HUMAN NATURE DOESN'T CHANGE.

That is why the cups and handles, double bottoms, etc. continue to work. HUMAN NATURE DOESN'T CHANGE. Human's nature is to survive and we are, therefore, fear and greed driven. And that is what cups and handles, double bottoms, etc. are all about.

Stick with the Armchair Investor non-emotional, fact-based analysis to ride the market as it rises and exit as it falls. I have never been ashamed of exiting a failing market or stock..... or of riding a winner up, no matter what "they" say.

A SIMILAR TIME IN HISTORY I've been looking for past examples and see a close one in 1998: a 33% drop during the "dotcom" rally in 1998, Everyone was sure 1998 was the top and got out. When it turned around, they all jumped in again. (continued next page)

When the 2000 crash occurred, their brokers told them to stay in because, "...It always comes back! Just look at 1998. When this market fails, I will just say, "GET OUT."

Reminder: I do not make recommendations - just ideas to consider.

CALL ME IF YOU ARE STUCK! Charlotte – 214-995-6702

>>>>I'm just hanging around the house!

BONUS CHART-READING HISTORY LESSONS:

Look at a Nasdaq or S&P500 daily chart as it crashed off the February all-time highs. (Charts are at the end of this newsletter.)

Notice the DOWN-TRENDING pattern of:

- frequent higher volume DOWN days (serious selling) and
- frequent lower volume UP days (lack of commitment to the upward move).

NOW NOTICE A SHIFT IN the PRICE-VOLUME PATTERN AS THE MARKET SLOWED DOWN AND THEN STARTED RISING:

- More consecutive rising days with higher volume (Nasdaq)
- A fresh upward move of 4 rising days in a row (Nasdaq)
- Those moves in the last week bring hope that this Uptrend is gathering steam AND it brings a concern that irrational exuberance may be driving this Uptrend.
- EITHER WAY – I am happy to ride this Uptrend until it dies... next week, next month or next year. STAY TUNED!

This “change in personality” is common when a Downtrend becomes an Uptrend.

DISTRIBUTION DAYS: >>> Scan across the volume over the last four weeks on a daily chart below. You will see almost all the tall volume bars (sticking up above their neighbors) are ... RED, showing higher volume on down days. T

HOW TO SEE DISTRIBUTION ON 2-COLOR CHARTS!

Distribution action is easiest to see when you are on a chart with two color volume lines, usually red for falling price days and green (or blue) for rising days. The fastest way to get a sense of the accumulation/distribution going on in a stock or index is to swing your eyes across the volume bars – noting the color of the highest bars - the red volume bar indicates the price dropped that day. The taller bar indicates the volume was higher.

REMEMBER:

THE MARKET CONTINUES IN THE DIRECTION IT IS GOING,

.....UNTIL IT DOESN'T !

With the Coronavirus spreading, it could be a... long,... cold... year!

>>>>But be sure to watch each stock in your portfolio for additional distribution days to signal an exit point. See selling rules chapter of “How to Make Money in Stocks” by William O’Neil, founder of Investor’s Business Daily.

THE ARMCHAIR INVESTOR TREND-FOLLOWING STRATEGY

A Simple and Powerful Tool to Increase Your Returns

Armchair Investor Mantra:

- **Be IN the market** when it is going up
- **Be OUT of the market** when it is going down
- **Protect your portfolio** with 8% stops.

The primary purpose of this Armchair Investor newsletter is to let you, the reader, earn bigger returns riding the trend of the market.

By following the best (most reliable) market change signals, you can:

- **Get in the market near the bottom** of a new bull market
- **Exit the market near the top**, and
 - **Capture more of the gains**,
 - **Avoid more of the losses** and, thus
 - **Earn higher returns** than the “buy-and-hold” strategy recommended by many brokers and money managers!

Why a “Buy-and-Hold” strategy doesn’t work well:

When the market has topped and starts to fall, do you really want to let your profits fade away as the market falls – sometimes for years? Of course not! Selling your uptrend position allows you to capture your gains and store them safely away in cash. What is the right time to exit? This newsletter will show you the market’s signal.

Most downtrends (also called corrections) fall faster than the uptrends rise.

I am not willing to sit in a sick, falling market and lose my hard earned gains!

Cash is a safer position!

Here are the three signals I will give you in this newsletter for the three market conditions:

- **Uptrends:** When the market rises into an Uptrend, buy and hold the QQQ, a stock that rises with the general market.
- **Uptrend showing Weakness:** As a market Uptrend starts to fall, you will receive the signal to exit the QQQ and safely wait in cash.
- **Downtrends:** If the market continues down, you will receive a signal to buy the PSQ, a stock that rises while the market falls.

FINALLY – For individual stocks: Use these market signals to help you when buying individual stocks. You increase your likelihood of a successful stock purchase if you only buy stocks when the market is in an Uptrend. Lesson: Don’t fight the market trend!

**HOW CAN YOU CAPTURE THOSE
GREAT MARKET GAINS SHOWN ABOVE?
USE THE ARMCHAIR INVESTOR PLAN:
*It's as easy as 1- 2- 3!***

STEP 1: Ride a rising market - hold the QQQ .

STEP 2: Protect your investments during a weakening Uptrend

STEP 3: Go to cash or PSQ in a falling market.

This newsletter will identify the market direction, (step 1, step 2 or step 3) and explain what you can do to grow and protect your portfolio.

STEP 1: In an Uptrend, hold the QQQ, a Nasdaq100 ETF

Find the market direction diagnosis every night in this newsletter.

- In the Uptrend, buy the QQQ the next morning if you don't yet have that position. This newsletter will alert you to the Uptrend signal! *The QQQ follows the ups and downs of the Nasdaq100, allowing you to grab the rises of an Uptrend.*
- With some additional positive action, you may decide to switch to the double QQQ ETF (QLD) or triple QQQ (TQQQ). I do not recommend these moves for the first time investor.

Just in case protection: When you receive your confirmation of the purchase, place an **8% STOP LOSS** order to protect your portfolio from a sudden market reversal (executing this sale is rare – I almost always sell when the market goes into “under pressure” or Downtrend – see Step 2 below). Your broker can help you set up this order.

This upward ride is the most exciting part of trend-following – Ride the escalator up, up, up as the market rises. Exit when the market starts to show significant weakness (read this newsletter nightly!

Although not every Uptrend signal generates a positive return, most do.

STEP 2: When the Uptrend slows down: “Uptrend under Pressure”

“Uptrend under Pressure” is a **Warning Message** and means:

- The market is showing significant distribution (selling pressure.)
Investors should:
 - **Be concerned about the strength of this Uptrend.**
During an Uptrend under Pressure, this newsletter may move into CASH position to avoid possible losses.
 - **Check on the health of your investments each night!** Many investors do not buy new stock positions during this period due to higher failure rates.
- **From STEP 2, “Uptrend under Pressure,”** the market diagnosis will go one of two ways:
 - **Rise** with price and volume strength, and return to **Uptrend – (STEP 1)**, or
 - Continue to add more distribution days and **fall** into a **Downtrend (correction)**
- This is a time to pay attention to the market behavior.

STEP 3: When the market diagnosis goes to “Downtrend”

Capture much of the gains from the Uptrend by selling your Uptrend ETF position (QQQ, QLD or TQQQ) when the market diagnosis goes into Downtrend to capture much of the gains earned in Steps 1 & 2 above.

After exiting the Uptrend ETF, wait in cash until the next Uptrend signal. More recent Downtrends have been short term and not tradable.

The Uptrend has been years long and strong. The market is due for a long dive. I will invest in the PSQ (inverse QQQ) ETF which makes profits as the market falls!

NOTE: Not every market direction signal ends with a positive return. But overall, this Market Tracking Strategy has outperformed the market when traded according to these signals.

BONUS: Plus the market direction signals will help you by indicating when it is most effective to consider adding individual stocks to your portfolio (with a strong uptrending market).

DO YOU INVEST IN INDIVIDUAL STOCKS?—

Always consider taking some profit if significant distribution is showing up for your individual stocks. However, many individual stocks are rising with gusto! Look at all the lists in the Investor's Business Daily newspaper for stocks breaking out with high volume. **They are there!**

To get a deeper sense of the health of the market, look at the **MARKET FACTORS, COUNTS & RATINGS table** included each day in the FULL Armchair Investor newsletter. It looks at 7 key market direction factors and highlights the leaning of each:

- If the factor leans toward the **Uptrend**, that box will be **green**
- If the factor leans toward the **Downtrend**, that box will be **orange** or **red**

One of the reasons I pay so much attention to the Investor's Business Daily strategies and books (*How to Make Money in Stocks* series) is that they work consistently.

Visit an ARMCHAIR INVESTOR CLASS

We have 3 live classes given each week in Dallas. These classes will be given **ONLINE** until we are cleared to meet in person. **Visit any class this week and next as my guest (2 free visits!).**

Register at the [Armchair Investor Meetup class site](#) to join the class you are interested in. Click on one of the links below to register. I occasionally take off for a class (or a week of them) for my own education or fun. If that is the case, those days will not be available for registration on Meetup.

- [Introduction to 5- minute investing Sundays 7 – 8 p.m.](#)
- [Monday nights 7 – 9 p.m.](#)
- [Tuesday afternoons 2:30 – 4:30 p.m.](#)
- [Wednesday mornings 10:00 a.m. to noon](#)
- All Classes meet ONLINE (during this “stay at home” time).
- Online classes and consultations available by appointment – **Call me for a FREE introduction!**

Newsletter readers get a FREE class visit:

Monday evening, Tuesday afternoon or Wednesday morning online.
Register on Meetup.com or call or text me to set up your visit.

Pre-REGISTRATION REQUIRED FOR YOUR FREE VISIT

Just Call or Text me: 214-995-6702

CALL EARLY: Guest Seating is limited.

WHAT HAPPENED LAST WEEK? (Updated on Friday's newsletter)

LAST WEEK'S MARKET ACTION			
9/25/20	Weekly Index % Change	Weekly Volume % Change	Volume Above/ Below 10-week Avg
Nasdaq	+1.1%	-6.7%	-1.0%
S&P 500	-0.6%	NYSE 500 Volume	
DJIA	-1.7%	-2.2%	+7.0%

A DAY-TO-DAY LOOK AT THE NASDAQ LAST WE/EK:

The prior week: The key to understanding the current market is to step back and look at the week as a whole. You can see the day-to-day price/volume action in the table below AND on the MARKET ACTION (Nasdaq) OVER THE LAST 20 DAYS table in this newsletter

>>>>>> Is the Nasdaq running out of steam? <<<<<<<

Look at the day-to-day price-volume action over last week (below).
The week ended with a rise of 1.1% for the Nasdaq (usually the leading indicator!)

You might feel the Uptrend is back! But **something is MISSING!**

And the missing piece is the other half of the market action equation – the *VOLUME!*
Notice the weakness in the price-volume action below.

- Not ONE rising day (Tuesday, Thursday and Friday) had higher volume! (That missing piece showed a lack of support for the rises.)
- The only day that had higher volume was Wednesday's HUGE DOWN DAY which made it a MAJOR DISTRIBUTION DAY – a day of heavy selling!

LAST WEEK'S DAILY MARKET ACTION						
	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	FOR THE WEEK
	9/21	9/22	9/23	9/24	9/25	
Nasdaq	-0.1%	+1.1%	-3.0%	+0.4%	+2.3%	+1.1%
Volume	-32.4%	-11.5%	+17.2%	-0.9%	-5.8%	
	Neither	Neither	Major Distribution	Neither	Neither	
<p>A Major Accumulation Day: Price RISES at least 1.0% or more with higher Volume than prior day. A Major Distribution Day: Price FALLS at least 1.0% or more with higher Volume than the day before. A Minor accumulation Day: Price RISES at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume). A Minor distribution Day: Price FALLS at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume). A Neither day: Price/volume action does not meet accumulation or distribution criteria</p>						

Yes, the market could go into Uptrend on Monday....or Tuesday....or Wednesday..... that is...sometime in the future. I won't know when until after it has happened!

NASDAQ Daily 4 month chart, (updated Friday 9/25/2020)

Nasdaq has "lived" below its 50-day moving average line for 7 trading days. The 50 day m.a. line is a traditional support line. And Downtrends typically move faster and wider as shown below!

NASDAQ Weekly 1 year chart, (updated Friday 9/25/2020)

Index hits a new low for 4th week in a row, falling below its 10-week moving average line.

These charts from StockCharts.com, a valuable site for investors with many free tools

S&P500 Daily 4 month chart, (updated Friday 9/25/2020)
S&P500 climbs above top of channel then dives below 50-day support line.

S&P500 Weekly 1 year chart, (updated Friday 9/25/2020)
Index hits a new low for 4th week in a row, falling below its 50-day m.a. line

These charts are from StockCharts.com, a valuable site for investors with many free tools

MARKET ACTION 2020 YEAR-TO-DATE			
9/29/20	2019 Closing Price	Current Price	Index % Change Year-to-Date
Nasdaq	8972.61	11085.25	+23.5%
S&P 500	3230.78	3335.47	+3.24%
DJIA	28538.44	27452.66	-3.8%
<small>This yearly table is included for your reference. These returns have little relevance to trend-following returns since trend-followers do not hold during "Downtrends" and may lighten their holdings during "Uptrends under Pressure."</small>

EXAMPLE of the DAILY MARKET ACTION table
with explanation of terms and signals:

THE DAILY MARKET ACTION						
9/27/19	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss from 8/13/2019 UPTREND SIGNAL
Nasdaq	7,939.63	-1.1%	+8.5%	-11.0%	Major Distribution	+1.7%
S&P500	2,961.79	-0.5%	NYSE Volume		minor distribution	+3.4%
DJIA	26,820.25	-0.3%	+5.1%	-12.0%	minor distribution	+3.8%

A **Major Accumulation Day**: Price RISES 1.0% or more with higher Volume than the day before.
A **minor accumulation Day**: Price RISES 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).
A **Major Distribution Day**: Price FALLS 1.0% or more with higher Volume than the day before.
A **minor distribution Day**: Price FALLS 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).
If the day's price/volume action does not meet the accumulation or distribution definitions above, it is a **neither day**.

** The **Recent Trend Gains/Losses** column calculates how far each index has moved from the recent trend change assuming you purchased the index (in an Uptrend) or sold the index (in a Downtrend) at the opening price on the day after the signal. Although not every year outperforms the common "buy and hold" strategy, using these signals has significantly OUTPERFORMED the buy-and-hold strategy in total since 1/1/2000.

Why are my Final Volumes Sometimes Different than Yours? Why do the volume numbers on this table not always match other web sites? The 4:00 close of the market immediately shows an accurate final price. But the volume figures continue to trickle in for hours. At some time, the accumulation of volume numbers has to be cut off and different sites use different cut-offs. Also, some sources include the volume of stocks listed on one exchange but traded on another (e.g. Apple stock listed on Nasdaq but also traded on other exchanges.) And some sources do not. The most important rule is to consistently use only one source for volume.

EXAMPLE and DEFINITIONS used in this newsletter:

DAILY MARKET ACTION						
10/25/19	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss from 8/13 UPTREND SIGNAL
Nasdaq	8,243.12	+0.70%	+1.2%	-2.1%	Neither	+5.3%
S&P500	3,022.55	+0.41%	NYSE Volume		Neither	+5.3%
DJIA	26,958.06	+0.57%	-9.2%	-1.5%	Neither	+4.3%
<p>A Major Accumulation Day: Price RISES at least 1.0% or more with higher Volume than prior day.</p> <p>A minor accumulation Day: Price RISES at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).</p> <p>A Major Distribution Day: Price FALLS at least 1.0% or more with higher Volume than the day before.</p> <p>A minor distribution Day: Price FALLS at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).</p> <p>If the day's price/volume action does not meet the accumulation or distribution definitions above, it is a "Neither" day.</p>						
<p>Why are my Final Volumes Sometimes Different than Yours? Why do the volume numbers on this table not always match other web sites? The 4:00 p.m. close of the market immediately shows an accurate final price. But the volume figures continue to trickle in for hours. At some time, the accumulation of volume numbers has to be cut off and different sites use different cut-offs. Also, some sources include the volume of stocks listed on one exchange but traded on another (e.g. Apple stock listed on Nasdaq but also traded on other exchanges.) And some sources do not. The most important rule is to consistently use the same source for your volume.</p>						

DO YOU INVEST IN INDIVIDUAL STOCKS?—

Always consider taking some profit if significant distribution is showing up for your individual stocks. However, many individual stocks are rising with gusto! Look at all the lists in the Investor's Business Daily newspaper for stocks breaking out with high volume. **They are there!**

To get a deeper sense of the health of the market, look at the MARKET FACTORS, COUNTS & RATINGS table included each day in the FULL Armchair Investor newsletter. It looks at 7 key market direction factors and highlights the leaning of each:

- If the factor leans toward the **Uptrend**, that box will be **green**
