

ARMCHAIR INVESTOR – THE MARKET’S MESSAGE

NEWSLETTER
A TREND-FOLLOWING STRATEGY

CURRENT MARKET DIRECTION: UPTREND

Armchair Investor Trend-following Investment Position:	I hold the QQQ
Armchair Investor 2020 Returns See trade details on page 2	+48.5% year-to-date In 12 trades! (see page 2)

THE MARKET’S MESSAGE: Usually, the Monday after Thanksgiving is a quieter day as traders extend the holiday weekend. But, thanks to the Washington rumor-mill’s machine, a comment attributed to President Trump of additional restrictions with China around high-tech products caused a serious negative reaction among traders in the morning. By 11 a.m. (NYC), the index stopped the fall and spent most of the rest of the day recovering.

Did you panic and sell some stocks between 10:30 and 11:00 a.m.? Yes, the market could have continued down. But I’ve seen these seriously scary swings evaporate too many times to react to them most of the time.

“But sometimes,” you say, “these big drops are the start of something worse! How will I know?” Look for the news! If the drop is caused by something substantial, you might take protective action. But in these times, a presidential rumor usually doesn’t cause my reaction.

It is common that many (most??) of these wild, intraday, reactionary swings settle down by the end of the day. And that is one reason that I don’t spend a lot of time watching the market during the day. When I check in around lunchtime, it is not uncommon that a morning swing has already leveled out. And I have my stops in place, just in case the market has the rare serious intra-day correction.

DAILY MARKET ACTION						
11/30/20	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Index Change from 11/4 New Uptrend*
Nasdaq	12198.74	-0.1%	+125.04%	+93.3%	Neither	+3.2%
S&P500	3621.63	-0.5%	+129.8%	Volume NYSE:	Minor distribution	+3.9%
DJIA	29638.64	-0.9%		+35.8%	Minor distribution	+5.5%

MY PLAN FOR TUESDAY: >>> I HOLD the QQQ (and that small DJIA position I bought for bragging rights. The DJIA outperformed the QQQ in November.)

The Armchair Investor Strategy Earns Extraordinary Returns for 2020
 And YOU could have earned this the return shown below if you followed
this nightly newsletter.

TOTAL Growth in 2020:						+48.5%	\$148,463	

A reader suggested we show how a portfolio would grow during the year. Thus, the new column on the right.

If you have any **questions** about the above table or something else in this newsletter, or **suggestions** how to make it clearer or more valuable, please call me to discuss.

Thank you! Charlotte (214) 995-6702 *Note: I am always looking at how I can enhance the information in this newsletter. Your suggestions help me do that. Keep 'em coming!*

THE WEDNESDAY (11/25/2020) MARKET'S MESSAGE (in case you missed it): According to Investors.com, 73% of all stocks have A or B ratings (stocks being heavily bought). **WOW!** I started tracking these ratings on a daily

basis in 2017. The only other time the A+B percent has been over 69 was on... June 8, 9, and 10 of this year. And look at what happened next. (see chart below) -- a brief pullback and then a 28% rise! Will this market repeat that run!

FRIDAY UPDATE: >>>>On Wednesday, I was looking for the market to rise next week with the vaccines getting closer and the 73% of stocks rated A or B for heavy buying! But the news of big increases in the number of people testing positive for the Corvid-19 virus over the weekend was disappointing and could put a damper on the market.

As always, I will wait for price and volume to show me the way!

I am not predicting the market will have that huge rise again. I do **NOT** expect a 28% repeat. I am putting you on alert to watch the market action. If this heavy buying indicates a new run-up, I don't want you to miss it. Yes, these are difficult times. I am watching very carefully. The QQQ is one of the best ways I know to grab a rising market.

With 73% of the stocks being heavily bought, the market could take off again. How will I know? Not till it happens. I hold my QQQ position. I hold a handful of the best individual stocks which have broken out of bases or bounced off "add-on" signals.

WILL THE MARKET TAKE OFF AGAIN? After almost 3 months of sideways consolidation, I see good news: Vaccines are getting closer. The election controversy is settling down. (The market likes certainty!)

Patti Domm (CNBC) says, "The large gains in November may steal from December's [Santa Claus] rally, but stocks are still expected to end the year at higher levels."

Fed Chairman Jerome Powell had no surprises on Wednesday afternoon. He gave a "continuation" of his 0% - 0.25% fed funds rate, a "slow rise" in inflation to 2% and falling unemployment expected. That's all pretty positive.

>>>Will the very high stock buying (as shown in the 73%A and B rated stocks) yield a rising market?

With all the concern in headlines, please remember:

The market climbs a "Wall of Worry!"

What does a “Wall of Worry” mean?

If the big players in the market were confident the market was in for a long rise, what would they do????

- The big money players would buy as much as they could at today’s “low” prices.
- You would see lots of rising days with higher volume – “accumulation days.”
-

But it is human nature to be cautious:

- How long will this uptrend run?
- If those “bad news” rumors turn out to be true. how fast can I exit?

BOTTOM LINE: The **buyers are in control**; this market is flying higher.

- Nasdaq rose above 12,000 for the last 3 days, hitting an all-time high on Wednesday, Thursday and Friday.
- The S&P500 is only 0.2% below its all-time high of 2 weeks ago.
- The DJIA is less than 1% below its Thursday all-time high.
- The usually lagging NYSE was the last of these four indexes to pop above its February high to a new, all-time high on Tuesday!

And note the market is flying higher measured by these extraordinary rises in all 4 indexes in the last 3 ½ weeks based on Wednesday’s close....I hope you were you in.

- The Nasdaq rose 12%
- The S&P500 rose 12%
- The DJIA rose 14%
- The NYSE rose 15%

Those indexes show the market is broadly climbing higher.

REMEMBER: The market continues in the direction it is going..... until it doesn’t.

PROGRESS IN ACCUMULATION/DISTRIBUTION RATINGS							
		A	B	C	D	E	As + Bs
4 weeks ago	10/30	6%	33%	26%	25%	10%	38%
3 weeks ago	11/6	10%	44%	24%	17%	5%	54%
2 weeks ago	11/13	12%	50%	22%	13%	3%	62%
1 week ago	11/20	17%	51%	18%	11%	3%	68%
Today	11/30	25%	48%	15%	9%	3%	73%
	# stocks in each rating:	1657	3229	992	626	183	

Stocks with an A or B rating are under accumulation (being bought.)
 Stocks with a D or E rating are under distribution (being sold).
 "2 weeks ago" is 10 market days ago; "4 weeks ago" is 20. The ratings which are higher than two weeks prior are colored light GREEN. Lower ratings are PINK.

Notice the BIG growth in "A" and "B" rated stocks over the last 3 weeks. The A + B stocks almost double in the last 3 weeks, rising from 45% to 73%. That growth in that growing percent of "A" and "B" rated stocks (shown in the table below) indicates that the institutional investors are now buying stocks heavily. But why?

Are they buying to get you to **buy in high** so they can again drop the price and get you to **sell it low**? Or is it because they believe they have scared out most of the persuadable individual investors and it's time for the market to start rising again?

>>>> I am still comfortable waiting on the sidelines after 3 losses in a row. (The last 2 were modest losses (1.2% and 1.2%) – but I don't like any losses just the same.) I watch for the Nasdaq to break above its 12074.07 all-time high on 9/2 of this year with higher volume to consider getting back in. And **if the market drops, there may be an earlier entry point.** Stay tuned!.

HOW CLOSE ARE THE INDICES TO ALL-TIME HIGHS?				
11/30/2020	Nasdaq	S&P500	DJIA	NYSE
Date of Index All-time High*	11/27/2020	11/9/2020	11/24/2020	11/24/2020
All-time High	12236.23	3645.99	30116.51	14271.09
Closing Price	12198.74	3621.63	29638.64	14006.46
Below (-) or Above (+) Recent High (%)	-0.3%	-0.7%	-1.6%	-1.9%

MARKET FACTORS, COUNTS & RATINGS		11/30/2020
Type of Day for <u>Nasdaq Index</u> Accumulation, Distribution or Neither	Neither	
I track the <u>Nasdaq's</u> price-volume because it usually leads the market direction.		
Market Direction Uptrend, Under Pressure, Downtrend	Uptrend	
<u>Nasdaq Accumulation & Distribution Days (last 20 days)</u> Only accumulation and distribution days <u>since the last market direction change</u> are in this count.	Accumulation Days	Distribution Days
	7	5
Count of Up Days and Down Days Nasdaq's last <u>10-days'</u> price movement	Up Days	Down Days
	6	3
Only days that move at least + or - 0.2% are included in the Up/Down count which does not always, therefore, add up to 10 days.		
Rising/Falling Ratio of Leader Stocks with High Volume Nasdaq 10-day ratio	1.4	
This indicator looks at the HEALTH of leading stocks (high RS rating) with strong financials (high EPS rating). Uptrend indicator: 1.5 or higher. Neutral: 1.0 to 1.49. Downtrend: less than 1.0		
Market Accumulation/Distribution Ratings "A": heavy accumulation, "B": moderate accumulation, "C": neutral, "D": moderate distribution, "E": heavy distribution. Accumulation = Institutions are BUYING, Distribution = Inst are SELLING	Nasdaq	D+
	S&P 500	B-
	DJIA	B
The Nasdaq as a whole, continues to lag the other indexes. But remember, just 8 days ago, it had an "E" distribution rating. I focus on the growth to D+.		
Are Major Indexes Above or Below Moving Averages? "At" is within 1% above or below the moving average.	50-Day	200-Day
Nasdaq	Above	Above
S&P 500	Above	Above
DJIA	Above	Above
NYSE	Above	Above

MARKET ACTION (Nasdaq) OVER THE LAST 20 DAYS

(For a full explanation of the terms used in this table see end of this newsletter)

On 11/24/2020, the Nasdaq hit a new all-time high! Then did it again on Friday 11/27! [The Nasdaq rose EVERY DAY last week totaling +2.9%](#) See the box around those 4 days below!!

#	Date	Closing Price	Index % Change	Volume % Change	Current Trend Day Count *	Type of Day: Accumulation, Distribution or Neither (—)	CONSISTENT WITH: UPTREND OR DOWNTREND?

1	11/30/20	12198.74	-0.1%	+125.0%	18	—	—

The market trading volume on **Wednesday and Friday** was light due to the Thanksgiving Day holiday on Thursday and early close on Friday. Thus I have not labeled Wednesday or Friday as “consistent with Downtrend” even though the index rose on lighter volume

* NOTE: The color of the “Current Trend Day Count” column indicates the market direction: Green = Uptrend, Yellow = Uptrend under Pressure, Red = Downtrend (correction).

Current Signs of Market Strength) as of Friday 11/27/2020)

- **The Nasdaq hit a new all-time high this week**, but lower Thanksgiving volume took away what could have been confirming volume.
- A whopping **73% of all stocks have an “A” or “B” rating**. That shows some serious buying in this market.

BOTTOM LINE: The buyers are in control; this market is flying higher.

- Nasdaq rose above 12,000 for the last 3 days as it hit that all-time high on Wednesday
- The S&P500 and Nasdaq are just 0.2% below their all-time highs.
- The usually lagging NYSE popped above its February high to a new, all-time high on Tuesday!

And note the market is flying higher measured by these extraordinary rises in all 4 indexes in the last 4 weeks(I hope you were you in)

- The Nasdaq rose 12%
- The S&P500 rose 11%
- The DJIA rose 13%
- The NYSE rose 14%
- **All the major indexes are near or have topped prior highs.**
- The **stocks with the best accumulation ratings of “A” and “B” ratings** have stayed above 50% for 3 weeks, indicating there is some serious buying going on.
- All the **major indexes are now ABOVE their 50-day and 200-day m.a. lines**

Current Signs of Market Weakness

- **The Nasdaq’s RS (relative strength) line has been flat** for almost 5 months indicating the Nasdaq is still strong but no longer outperforming the S&P500.
- **The Nasdaq tried to beat its 9/2 highs several times without success**. This Uptrend does NOT have wings (yet???)
- **>>>The Leader stocks RISING versus FALLING remains at a disappointing 1.3 ratio**. This low ratio is an indicator of broad selling of the best stocks! A rating below 1.5 indicates an uncertain Uptrend OR a rotation away from exhausted, out of favor leader stocks as new leaders emerge. (A rating below 1.0 is weak.)
- With Trump’s holding out on calling the election results, the governmental transition may be very difficult causing confusion and possible international weakness. The market hates uncertainty.

THE NASDAQ UPWARD AND DOWNWARD CHANNELS

One of the features I like about [Investors.com's MarketSmith charts](#) is that I can draw in my own channel lines.

Below is the Nasdaq chart for the last 12 months. It shows:

- the January+ Uptrend that continued in the beginning of the year,
- The pink downtrend as the market crashed in February-March
- The amazing 5-month rise (Uptrend) of the market since March low.

Did you know annotations stay on the MarketSmith charts! Bravo to the designers. My notations will stay on the MarketSmith charts for years! I can go back and visit how I saw the market in 2000, 2008, 2015-16, etc.

That is one of MarketSmith's many truly unique and valuable features! I don't have to figure out what happened in those past periods again

My annotations are there! Updated, Tuesday 10/19/2020. Vertical red lines identify distribution days (down days with higher volume indicating serious selling.)

>>>> I HIGHLY RECOMMEND IBD's MarketSmith for your investing CHARTS! Note the excellent annotations and markups I have added on the chart below.

Go to [MarketSmith.com](#) to try it out. All my distribution day notations (pink vertical lines) will be visible for years! I recently went back to the 2000 high. Yes – annotations were there! The vertical red lines indicate “distribution days” of serious selling.

DO YOU MAKE THESE INVESTING MISTAKES?

- Do you miss buying a great stock at the price you knew was right?
- Do you sell too early and watch it continue to rise without you?
- Do you hold on too long and lose the gains you just had?

- **Or are you just starting out** and want a simple, proven method that has outperformed the market in just 5 minutes a day?

- Either way, we have an **ARMCHAIR INVESTOR** class for you!

PICK THE ARMCHAIR INVESTOR ONLINE CLASS THAT'S RIGHT FOR YOU:

SUNDAY'S 5-Minute Investor with Market Analysis.

This 1-hour class about Market Direction is foundational – If you get the market direction wrong, you are much more likely to lose money. Attended by beginners and experts alike. FREE to all (at the moment). Once you learn this strategy, it's yours for life!

3 TIMES A WEEK Armchair Investor Workshops

Learn how to buy the best stocks at the right time. And then, learn how to track them to identify the right time to take your profits to the bank!

Choose the BEST CLASS for you: Join us on **MONDAY** 7 – 9 P.M. **Tuesday** 2:30 – 4:30 p.m. or **Wednesday** (10 a.m. – noon) for an [online Armchair Investor class](#)

<<. Are you new to the Armchair Investor classes? **Visit for 2 weeks FREE as my guest!** Call or text me at 214-995-6702 to let me know you are coming.

[Click here to register for 2 weeks of FREE Armchair Investor Online Classes](#)

<<. Are you new to the Armchair Investor classes? **Visit for 2 weeks FREE as my guest!** Please call or text me at 214-995-6702 to let me know you are coming. Here is why you should visit.

SUNDAY: Learn to be a 5-Minute Investor!.

This strategy has earned over 45% this year – following my 9 trades.

The weekly 1-hour class about Market Direction is foundational – If you get the market direction wrong, you are much more likely to lose money. Attended by beginners and experts alike. Open to all (at the moment). Join us by clicking here [online Armchair Investor class](#). **Look for the Sunday class**

MONDAY, TUESDAY or WEDNESDAY Armchair Investor Stock analysis 2-HOUR CLASS

This class is given 3 times each week. Choose the BEST TIME for you: Join us on MONDAY 7 – 9 P.M. Tuesday 2:30 – 4:30 p.m. or Wednesday (10 a.m. – noon) for an [online Armchair Investor class](#) Be sure to check for the date your wish to visit. The class meets 11 weeks each quarter (2 weeks off for research and fun).

Click on this link to join us for any class: [online Armchair Investor class](#)

Once you register online – the link to your online meeting is revealed.

When you register for an online Armchair Investor class, suggest a few stocks review in the class! *If you own a stock and are considering SELLING THAT STOCK, please note “SELL?” after the ticker.*

COMPARISON of the NASDAQ, S&P500 and DJIA Growth

(updated weekly on Fridays)

The chart below shows the one-year returns of the **Nasdaq, the S&P500 and the DJIA**. Where should you go shopping? The answer for me? Nasdaq! And, yes! I will buy a top stock wherever I find it! These results are why I focus on the Nasdaq and QQQ for my trend-following strategy:

REMEMBER: BUY & HOLD IS NOT A STRONG INVESTING STRATEGY.

Imagine the difference in returns if you could just wait in cash as the market falls and get back in as it starts back up!

- It isn't necessary to get in at the bottom or out at the top!
- Just stepping out of the market somewhere *near the top* and getting back in *near the bottom* has had a HUGE IMPACT on my portfolio.

It can take YEARS to complete a market Downtrend (correction) then recover back to where you were.

An EXAMPLE OF WHY BUY-AND-HOLD” COSTS YOU BIG BUCKS THIS YEAR.

- Over the last year, a “buy and hold” strategy has earned 5% for the S&P500. “Buy and hold” worked better for the Nasdaq earning 39%. ***But wait...***
- **If you invested with the Armchair Investor strategy, you are UP 48.2% for 2020.** (see [page 2](#) for daily updates of current Armchair Investor Strategy returns)
- Where do you want your money invested? Here's where many answer: **“The Armchair Investor strategy!”**

One last note: IF you invest in individual stocks, the best can be found on **both major indexes** (the Nasdaq and S&P500). Be sure to find the stocks with best ratings, base action and breakouts.

MARKET/CHART READING LESSON:

The MarketSmith Relative Strength Line – My favorite!

Go to any chart on the Investors.com web page. You will see the bumpy line labeled RS for Relative Strength. This line moves up or down with each price bar showing if this stock or index rose more or less than the S&P500.

Look at the Nasdaq daily chart (0NDQC) and notice that the RS line has risen since the Oct 2019 low, indicating it has earned higher returns.

Go to the monthly chart and note that the Nasdaq has consistently outperformed the S&P500. (not ever month but most). The S&P500 does have some great stocks. That rising RS line tells us that, over time, the Nasdaq as a whole has done better than the S&P500. But just like shopping for groceries, I will buy from the market that has the best fruit, on any given day.

The Nasdaq continues to outperform the S&P500. Watch the RS line on Investors.com charts. This important line shows you how a stock or index is performing compared to the S&P500. A rising line indicates that stock or index has risen faster than the S&P500 (measured in percentage change.)

Note: Do not confuse IBD's RS line with the RSI line some charting system use. The RS measures how a stock is moving compared to the S&P500. Rising faster gives a higher rating. *Investopedia.com states: The relative strength index (RSI) is a momentum indicator that measures the magnitude of recent price changes to evaluate "overbought" or "oversold" **conditions** in the price of a stock or other asset.*

The problem I have found with the RSI line is that some of the best, rising stocks can push an RSI line to the top of the rating (indicating overbought) just when I have a buy signal. As always, I tell you to use the indicators you find useful (profitable).

I am excited about the settling down in market volume. But I continue to be concerned about the sustained day-to-day price volatility. It is surely affected by the uncertainty of the upcoming earnings announcements. **BE SURE YOUR STOPS ARE IN PLACE.**

Every Day's Lesson: Whether you agree with your stock's daily results or not...

- **YOUR JOB is to monitor its daily results and adjust your action accordingly.**
 - **Monday: Monitor.....and.....adjust.**
 - **Tuesday: Monitor.....and.....adjust.**
 - **Wednesday: Monitor.....and.....adjust.**
 - **Thursday: Monitor.....and.....adjust.**
 - **Friday: Monitor.....and.....adjust.**
 - **(repeat)**

KEY MARKET CONCEPTS USED IN THIS NEWSLETTER

If the horse you are riding, dies. GET OFF!

When the market (or your stock) dies – whether that is in a year, a month or tomorrow, the Armchair Investor Strategy will NOT “stay the course” and we won’t ride a falling market down. Instead, we will use our 20 years of market direction experience to identify optimum times to be in the market and times to be out of the market. *(not guaranties!) (PS I love horses. They are amazing companions.)*

Using my day-to-day price-volume analysis, my students and I have consistently been able to make money by:

“Getting IN near the bottom” and “Getting OUT near the top.”

The Armchair Investor strategy has allowed me to earn well-above-average returns since the 2000 top! See page 2 for this year’s exciting wins!

Prepare yourself for a NEW ECONOMY!

I expect a major shift in how we do business: more online appointments, more working from home, reduced business travel (with reduced costs to businesses) We might actually see this lockdown period as **a slingshot into the a new, sleeker way of conducting business. And each of those new trends will help some business (online meetings, internet providers, online schools, casual clothing, healthy ready-to-eat food....)**
>>>>>>>> I would like to hear your ideas of where the big gains will occur!

Which industry groups and specific companies will thrive and which will dive in the after pandemic new economy???

WILL HISTORY REPEAT ITSELF? In the financial crisis of 2007, it took the market 2 1/2 years to recover the 56% drop. Worse yet was the reaction to the dot.com 90's market over-inflation that crashed in March of 2000 and took 19 years for the market to "break even."

WHAT CAN WE (INDIVIDUAL INVESTORS) DO NOW? ONE lesson I have learned from every greatest investor I have studied:

HUMAN NATURE DOESN'T CHANGE.

That is why the cups and handles, double bottoms, etc. continue to work. HUMAN NATURE DOESN'T CHANGE. Human's nature is to survive and we are, therefore, fear and greed driven. And that is what cups and handles, double bottoms, etc. are all about.

Stick with the Armchair Investor non-emotional, fact-based analysis to ride the market as it rises and exit as it falls. I have never been ashamed of exiting a failing market or stock..... or of riding a winner up, no matter what "they" say.

A SIMILAR TIME IN HISTORY I've been looking for past examples and see a close one in 1998: a 33% drop during the "dotcom" rally in 1998, Everyone was sure 1998 was the top and got out. When it turned around, they all jumped in again.

When the 2000 crash occurred, their brokers told them to stay in because, "...It always comes back! Just look at 1998. When this market fails, I will just say, "GET OUT."

Reminder: I do not make recommendations - just ideas to consider.

>>>>>I'm just hanging around the house waiting for your call!

BONUS CHART-READING HISTORY LESSONS:

Look at a Nasdaq or S&P500 daily chart as it crashed off the February 2020 all-time highs. (Charts are at the end of this newsletter.)

Notice the DOWN-TRENDING pattern of:

- frequent higher volume DOWN days (serious selling) and
- frequent lower volume UP days (lack of commitment to the upward move).

NOW NOTICE A SHIFT IN the PRICE-VOLUME PATTERN AS THE MARKET SLOWED DOWN AND THEN STARTED RISING:

- More consecutive rising days with higher volume (Nasdaq)
- A fresh upward move of 4 rising days in a row (Nasdaq)
- Those moves in the last week bring hope that this Uptrend is gathering steam AND it brings a concern that irrational exuberance may be driving this Uptrend.
- EITHER WAY – I am happy to ride this Uptrend until it dies... next week, next month or next year. STAY TUNED!

This “change in personality” is common when a Downtrend becomes an Uptrend.

DISTRIBUTION DAYS: >>> Scan across the volume over the last four weeks on a daily chart below. You will see almost all the tall volume bars (sticking up above their neighbors) are ... RED, showing higher volume on down days. T

HOW TO SEE DISTRIBUTION ON 2-COLOR CHARTS!

Distribution action is easiest to see when you are on a chart with two color volume lines, usually red for falling price days and green (or blue) for rising days. The fastest way to get a sense of the accumulation/distribution going on in a stock or index is to swing your eyes across the volume bars – noting the color of the highest bars - the red volume bar indicates the price dropped that day. The taller bar indicates the volume was higher. (MarketSmith and other IBD charts have this 2-color feature!

REMEMBER:

THE MARKET CONTINUES IN THE DIRECTION IT IS GOING,
.....UNTIL IT DOESN'T !

With the Coronavirus spreading, it could be a... long... cold... year!

>>>>But be sure to watch each stock in your portfolio for additional distribution days to signal an exit point. See selling rules chapter of “How to Make Money in Stocks” by William O’Neil, founder of Investor’s Business Daily.

THE ARMCHAIR INVESTOR TREND-FOLLOWING STRATEGY

A Simple and Powerful Tool to Increase Your Returns

Armchair Investor Mantra:

- **Be IN the market** when it is going up
- **Be OUT of the market** when it is going down
- **Protect your portfolio** with 8% stops.

The primary purpose of this Armchair Investor newsletter is to let you, the reader, earn bigger returns riding the trend of the market.

By following the best (most reliable) market change signals, you can:

- **Get in the market near the bottom** of a new bull market
- **Exit the market near the top**, and
 - **Capture more of the gains**,
 - **Avoid more of the losses** and, thus
 - **Earn higher returns** than the “buy-and-hold” strategy recommended by many brokers and money managers!

Why a “Buy-and-Hold” strategy doesn’t work well:

When the market has topped and starts to fall, do you really want to let your profits fade away as the market falls – sometimes for years? Of course not! Selling your uptrend position allows you to capture your gains and store them safely away in cash. What is the right time to exit? This newsletter will show you the market’s signal.

Most downtrends (also called corrections) fall faster than the uptrends rise.

I am not willing to sit in a sick, falling market and lose my hard earned gains!

Cash is a safer position!

Here are the three signals I will give you in this newsletter for the three market conditions:

- **Uptrends:** When the market rises into an Uptrend, buy and hold the QQQ, a stock that rises with the general market.
- **Uptrend showing Weakness:** As a market Uptrend starts to fall, you will receive the signal to exit the QQQ and safely wait in cash.
- **Downtrends:** If the market continues down, you will receive a signal to buy the PSQ, a stock that rises while the market falls.

FINALLY – For individual stocks: Use these market signals to help you when buying individual stocks. You increase your likelihood of a successful stock purchase if you only buy stocks when the market is in an Uptrend. Lesson: Don’t fight the market trend!

**HOW CAN YOU CAPTURE THOSE
GREAT MARKET GAINS SHOWN ABOVE?
USE THE ARMCHAIR INVESTOR PLAN:
*It's as easy as 1- 2- 3!***

STEP 1: Ride a rising market - hold the QQQ .

STEP 2: Protect your investments during a weakening Uptrend

STEP 3: Go to cash or PSQ in a falling market.

This newsletter will identify the market direction, (step 1, step 2 or step 3) and explain what you can do to grow and protect your portfolio.

STEP 1: In an Uptrend, hold the QQQ, a Nasdaq100 ETF

Find the market direction diagnosis every night in this newsletter.

- In the Uptrend, buy the QQQ the next morning if you don't yet have that position. This newsletter will alert you to the Uptrend signal! *The QQQ follows the ups and downs of the Nasdaq100, allowing you to grab the rises of an Uptrend.*
- With some additional positive action, you may decide to switch to the double QQQ ETF (QLD) or triple QQQ (TQQQ). I do not recommend these moves for the first time investor.

Just in case protection: When you receive your confirmation of the purchase, place an **8% STOP LOSS** order to protect your portfolio from a sudden market reversal (executing this sale is rare – I almost always sell when the market goes into “under pressure” or Downtrend – see Step 2 below). Your broker can help you set up this order.

This upward ride is the most exciting part of trend-following – Ride the escalator up, up, up as the market rises. Exit when the market starts to show significant weakness (read this newsletter nightly!

Although not every Uptrend signal generates a positive return, most do.

STEP 2: When the Uptrend slows down: “Uptrend under Pressure”

“Uptrend under Pressure” is a **Warning Message** and means:

- The market is showing significant distribution (selling pressure.)
Investors should:
 - **Be concerned about the strength of this Uptrend.**
During an Uptrend under Pressure, this newsletter may move into CASH position to avoid possible losses.
 - **Check on the health of your investments each night!** Many investors do not buy new stock positions during this period due to higher failure rates.
- **From STEP 2, “Uptrend under Pressure,”** the market diagnosis will go one of two ways:
 - **Rise** with price and volume strength, and return to **Uptrend – (STEP 1)**, or
 - Continue to add more distribution days and **fall** into a **Downtrend (correction)**
- This is a time to pay attention to the market behavior.

STEP 3: When the market diagnosis goes to “Downtrend”

Capture much of the gains from the Uptrend by selling your Uptrend ETF position (QQQ, QLD or TQQQ) when the market diagnosis goes into Downtrend to capture much of the gains earned in Steps 1 & 2 above.

After exiting the Uptrend ETF, wait in cash until the next Uptrend signal. More recent Downtrends have been short term and not tradable.

The Uptrend has been years long and strong. The market is due for a long dive. I will invest in the PSQ (inverse QQQ) ETF which makes profits as the market falls!

NOTE: Not every market direction signal ends with a positive return. But overall, this Market Tracking Strategy has outperformed the market when traded according to these signals.

BONUS: Plus the market direction signals will help you by indicating when it is most effective to consider adding individual stocks to your portfolio (with a strong uptrending market).

DO YOU INVEST IN INDIVIDUAL STOCKS?—

Always consider taking some profit if significant distribution is showing up for your individual stocks. However, many individual stocks are rising with gusto! Look at all the lists in the Investor's Business Daily newspaper for stocks breaking out with high volume. **They are there!**

To get a deeper sense of the health of the market, look at the **MARKET FACTORS, COUNTS & RATINGS table** included each day in the FULL Armchair Investor newsletter. It looks at 7 key market direction factors and highlights the leaning of each:

- If the factor leans toward the **Uptrend**, that box will be **green**
- If the factor leans toward the **Downtrend**, that box will be **orange** or **red**

One of the reasons I pay so much attention to the Investor's Business Daily strategies and books (*How to Make Money in Stocks* series) is that they work consistently.

Visit an ARMCHAIR INVESTOR CLASS

We have 3 live classes given each week in Dallas. These classes will be given **ONLINE** until we are cleared to meet in person. **Visit any class this week and next as my guest (2 free visits!).**

Register at the [Armchair Investor Meetup class site](#) to join the class you are interested in. Click on one of the links below to register. I occasionally take off for a class (or a week of them) for my own education or fun. If that is the case, those days will not be available for registration on Meetup.

- [Introduction to 5- minute investing Sundays 7 – 8 p.m.](#)
- [Monday nights 7 – 9 p.m.](#)
- [Tuesday afternoons 2:30 – 4:30 p.m.](#)
- [Wednesday mornings 10:00 a.m. to noon](#)
- All Classes meet ONLINE (during this “stay at home” time).
- Online classes and consultations available by appointment – **Call me for a FREE introduction!**

Newsletter readers get a FREE class visit:

Monday evening, Tuesday afternoon or Wednesday morning online.
Register on Meetup.com or call or text me to set up your visit.

Pre-REGISTRATION REQUIRED FOR YOUR FREE VISIT

Just Call or Text me: 214-995-6702

CALL EARLY: Guest Seating is limited.

WHAT HAPPENED LAST WEEK? (Updated on Friday's newsletters and shown on page 3 of the newsletter on Monday. If you missed it on Monday, this page is always shown near the end of the newsletter)

Volume was lighter for the Thanksgiving week.

>>>> The Market returned to UPTREND <<<<

Much ignored S&P500 and DJIA stocks take off.

LAST WEEK'S MARKET ACTION			
11/27/20	Weekly Index % Change	Weekly Volume % Change	Volume Above/ Below 10-week Avg
Nasdaq	+3.0%	-17.4%	-13.3%
S&P 500	+2.3%	NYSE 500	Volume
DJIA	+2.2%	-19.5%	-20.7%

LAST WEEK'S DAILY MARKET ACTION						
	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	FOR THE WEEK
	11/23	11/24	11/25	11/26	11/27	
Nasdaq	+0.2%	+1.3%	+0.5%	<i>Happy</i>	+0.9%	+2.9%
Volume	-0.0%	+18.2%	-28.6%	<i>Thanks-</i>	-22.8%	
	Neither	Major Accumulation	Neither	<i>giving</i>	Neither

S&P500 Daily 4 month chart (updated Friday 11/27/2020)

These daily charts are usually updated on Wednesdays and Fridays.

11/20 New Uptrend holds near new highs.

S&P500 Weekly 1 year chart, (updated Friday 11/27/2020)

Index beaks above sideways channel.

These charts are from StockCharts.com, a valuable site for investors with many free tools

MARKET ACTION 2020 YEAR-TO-DATE			
11/30/20	2019 Closing Price	Current Price	Index % Change Year-to-Date
Nasdaq	8972.61	12,198.74	+36.0%
S&P 500	3230.78	3,621.63	+12.1%
DJIA	28538.44	29,638.64	+3.9%
<p>This yearly table is included for your reference. These returns have <u>little relevance</u> to trend-following returns since trend-followers do not hold during "Downtrends" and may lighten their holdings during "Uptrends under Pressure." Some people like it as a scorecard for their results this year.</p>

DISCLAIMER, "Buyer Beware" WARNING:

This newsletter shares the ideas I use in my investing.
 It is not investing advice but should be taken as education only.
 Your investment decisions are your responsibility as are the results.
 If you are not comfortable with or do not understand a strategy completely,
 I recommend that your paper-trade until you are successful and can sleep well at night.

Call me to explore your investing questions!
Charlotte Hudgin, 214-995-6702

See additional definitions on the following pages....

EXAMPLE of the DAILY MARKET ACTION table
with explanation of terms and signals:

THE DAILY MARKET ACTION						
9/27/19	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss from 8/13/2019 UPTREND SIGNAL
Nasdaq	7,939.63	-1.1%	+8.5%	-11.0%	Major Distribution	+1.7%
S&P500	2,961.79	-0.5%	NYSE Volume		minor distribution	+3.4%
DJIA	26,820.25	-0.3%	+5.1%	-12.0%	minor distribution	+3.8%

A **Major Accumulation Day**: Price RISES 1.0% or more with higher Volume than the day before.
A **minor accumulation Day**: Price RISES 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).
A **Major Distribution Day**: Price FALLS 1.0% or more with higher Volume than the day before.
A **minor distribution Day**: Price FALLS 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).
If the day's price/volume action does not meet the accumulation or distribution definitions above, it is a **neither day**.

** The **Recent Trend Gains/Losses** column calculates how far each index has moved from the recent trend change assuming you purchased the index (in an Uptrend) or sold the index (in a Downtrend) at the opening price on the day after the signal. Although not every year outperforms the common "buy and hold" strategy, using these signals has significantly **OUTPERFORMED** the buy-and-hold strategy in total since 1/1/2000.

Why are my Final Volumes Sometimes Different than Yours? Why do the volume numbers on this table not always match other web sites? The 4:00 close of the market immediately shows an accurate final price. But the volume figures continue to trickle in for hours. At some time, the accumulation of volume numbers has to be cut off and different sites use different cut-offs. Also, some sources include the volume of stocks listed on one exchange but traded on another (e.g. Apple stock listed on Nasdaq but also traded on other exchanges.) And some sources do not. The most important rule is to consistently use only one source for volume.

EXAMPLE and DEFINITIONS used in this newsletter:

DAILY MARKET ACTION						
10/25/19	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss from 8/13 UPTREND SIGNAL
Nasdaq	8,243.12	+0.70%	+1.2%	-2.1%	Neither	+5.3%
S&P500	3,022.55	+0.41%	NYSE Volume		Neither	+5.3%
DJIA	26,958.06	+0.57%	-9.2%	-1.5%	Neither	+4.3%
<p>A Major Accumulation Day: Price RISES at least 1.0% or more with higher Volume than prior day.</p> <p>A minor accumulation Day: Price RISES at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).</p> <p>A Major Distribution Day: Price FALLS at least 1.0% or more with higher Volume than the day before.</p> <p>A minor distribution Day: Price FALLS at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).</p> <p>If the day's price/volume action does not meet the accumulation or distribution definitions above, it is a "Neither" day.</p>						
<p>Why are my Final Volumes Sometimes Different than Yours? Why do the volume numbers on this table not always match other web sites? The 4:00 p.m. close of the market immediately shows an accurate final price. But the volume figures continue to trickle in for hours. At some time, the accumulation of volume numbers has to be cut off and different sites use different cut-offs. Also, some sources include the volume of stocks listed on one exchange but traded on another (e.g. Apple stock listed on Nasdaq but also traded on other exchanges.) And some sources do not. The most important rule is to consistently use the same source for your volume.</p>
