

4/29/2022 **DOWNTREND** – Yikes! Do you hear that crashing sound? That’s the Market tumbling down in the DOWNTREND. Nasdaq lost 4.2% on Friday.

ARMCHAIR INVESTOR Newsletter: THE MARKET’S MESSAGE
A TREND-FOLLOWING STRATEGY

MARKET’S MESSAGE: “I’M TIRED!” (I’ve been telling you this!” - the Market!)

Armchair Investor Trend-following Investment Position:	Holding 100% CASH
---	--------------------------

Armchair Investor 2022 Returns: See trades on page 8	ACI Return for 2022 YTD: -4.4%
BUY & HOLD QQQ (<i>NOT</i> recommended!):	“Buy & Hold” Return for 2022 YTD -21.3%

Yikes! Do you hear that crashing sound? That’s the Market tumbling lower into the DOWNTREND. Nasdaq is now 3.9% below last Friday.

How bad is that news? Consider these comparisons:

As of Friday 4/29, the Nasdaq is 23.9% below its all-time high (11-22-2021.) Notice the Nasdaq’s personality – it drops rather hard, then bounces back up. Some downtrends are not so rough.

Notable are the last 2 bounces – both stopped when they git near the 200-day moving average line.

And the lower lows are getting closer together.

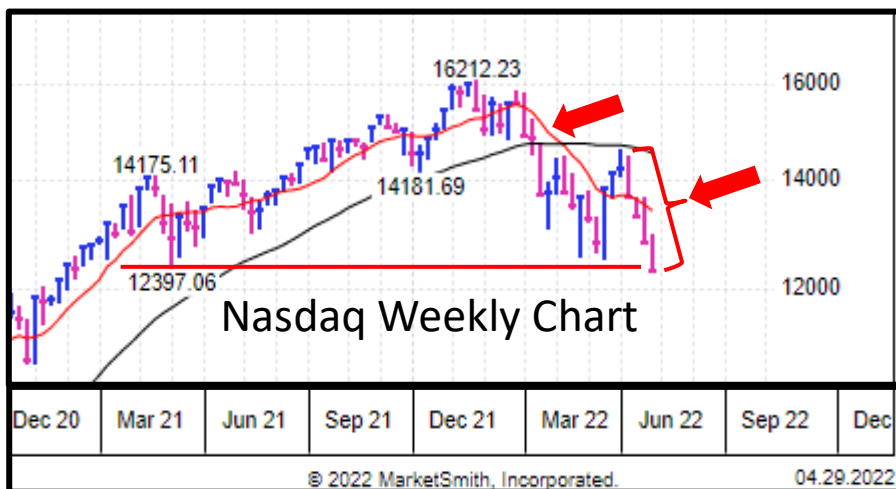

Is the market getting ready for a new, more powerful Uptrend?

The economic conditions are not encouraging!

Recently, the Nasdaq had a run of loses including losing 17.3% in just 3 weeks and a day ending on 1/24 (note the higher red arrow.) Then...

- During the last 4 weeks, the Nasdaq lost 12.5% and every week closed lower. (red arrow with red bracket.)

And note: Friday was the first day **the Nasdaq closed below the 3/4/21 low making a 13-month round trip!**

Cutting further under that prior low could add chatter supporting a continued drop. It's the chatter as much as the news and numbers that can fuel the market direction.

All of the above data is to make it clear that the **Downtrend is in full swing**. (You may believe otherwise, but remember the humbling lesson I learning in the dips of 2000 –

- The market does not care about my “fine” opinion.
- And... even though I have a fine opinion of my fine opinion ---- well, you get it --- refer to the line above – the market still doesn't care.

One of the best rules you can set up for yourself is an oldie but goodie:

- The market is always right. (If you doubt this rule, please realize the market cannot be wrong – the market is the truth of the moment.)

Now that the market has hit a 12-month low (and almost 5-month drop from its all-time high), you have to be aware of the Downtrend train:

- Please note I am not ready to go short (yet), but I am not holding onto any stock that isn't holding up!
- >>> **This lesson was passed on from William O'Neil**. He saw many investors hang onto losing stocks to avoid tax consequences. As I remember his comment, he said:
 - Yes, there are tax consequences to consider. But I can tell you many individual investors end up paying more in losses than the taxes would have cost them. You will have to do your own math. Or talk to the rare accountant that actually understands investing tax implications.
(Charlotte: If you have one, please consider passing the name and

contact info to me. I would like to have a national data base of these rare, wise folks to share.)

How are your “buy & hold” buddies doing? I hope they will consider at least exiting from their worst performers. (That last comment was a backdoor way of suggesting you also get out of your biggest losers.)

Remember: The market continues in the direction it is going.... until it doesn't.

And the direction today is DOWN.

What NOT to do about the current downtrend – blindly hold every stock you “like,” every stock that you “believe” in.. There may even be some stocks in your portfolio that still have a profit in them. Please set a price where you will sell that stock if it falls to that price.... No matter what.

>>>> One of the most common causes of mediocre returns is letting a winner fade down to the price you bought it at,.... Then to a small loss..... Then deciding it's too late to sell because the stock has lost so much.

Or I hear inexperienced investors say, I'll just hold it until it returns to the price I bought it at.... Then I'll sell it. But tell that to the investors of 2000.... who lived through a 75% drop over 2 1/2 years in the Nasdaq?

Do you have some winners?.... stocks that aren't showing serious weakness? Yes, You can hold onto them as long as you can keep daily eye on them.

DAILY MARKET ACTION					
4/29/22	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?
Nasdaq	12,334.64	-4.2%	-6.6%	-9.0%	Neither
NYSE Volume used for S&P500 and DJIA					
S&P500	4,131.93	-3.6%	+5.1%	+3.8%	Major Distribution
DJIA	32,977.21	-2.7%			Major Distribution

FOR MONDAY: I remain in 100% CASH in my trend-following position.
(You may decide to hold winning stocks, also.)

***Wishing you, “Many happy returns,” Charlotte Hudgin,

I am looking forward to returning to LIVE, IN-PERSON DALLAS and FORT WORTH IBD monthly classes but I'd like a LIVE venue in both cities (usually held on the last Wednesdays and Thursdays of the month.)

- Who can check with the Pancake house in Fort Worth?
- Who can suggest a location in Dallas area – preferably north of downtown, or in Addison?

>>>>>> CAN YOU SUGGEST A MEETING ROOM WITH WI-FI? IT COULD BE A FAVORITE RESTAURANT, LIBRARY, BUSINESS OR OTHER MEETING ROOM where we can meet for future IBD Meetups in Dallas?

PLEASE LET CHARLOTTE HUDGIN KNOW. (214) 995-6702

Charlotte wrote: Since 2003, I have had the pleasure and honor of presenting the ARMCHAIR INVESTOR weekly classes and the monthly INVESTOR'S BUSINESS DAILY Meetups in Dallas and in Fort Worth.

A special “Thanks!” to all of you who support us, showing up early to set up the rooms, greet guests and the necessary food tasters at our Christmas parties (but not this year.) I look forward to enlisting your help when we start back with LIVE Meetups!— I especially thank you to:

- **Fred Richards** for his amazing market insights and presentations to the group. He is in the process of moving to a new home in the area and I expect to have him join us in the future.
- **Ron Shaw** for tirelessly greeting guests (one of the most organized, happy guys I know) and handing out the printed copies of the class notes.
- **And all the others** who greeted first time guests, substituted for Ron, found meeting space or stepped in at the last minute to find extension cords, extra tables and chairs, etc. etc. etc.
- The good news, with Wi-Fi, I plan on continuing the Online Meetups!
- It takes a village! Thank you.

Join the next Dallas and Fort Worth Investor's Business Daily's ONLINE Meetup 6:30 – 8:30 p.m. usually on the fourth or last Wednesday of each month. Watch out! Meetup dates change to avoid holidays in November and December

PRIOR NOTE ABOUT THE CURRENT ECONOMY:

A few notes on recent inflation (repeat of yesterday's list):

- **The latest jobs report shows strong hiring and wage growth.**
- **But there's a concern: Is the Labor market overheating?**
- **If the Federal Reserve is concerned about inflation, they will "supersize" the planned May interest rate increase to 1/2%.**
- **The March jobs report showed job growth of 431,000, the 11 month in a row over 400,000, the longest period of this growth since the numbers were recorded in 1939!**

My point is, the economy is growing well and, therefore, expanding. Inflation rather than employment is now the current concern.

NOTE ABOUT CURRENT DISTRIBUTION DAYS:

Every Uptrend has DISTRIBUTION DAYS along the way. **A distribution day occurs when a stock or index drops 0.2% or more with higher volume.** It points to higher selling than buying. We know:

- **No stock or market index rises every day, even in an Uptrend.** (And no stock or market index falls every day in a Downtrend).
- **If the index or stock falls in an Uptrend, we prefer the volume to be lighter, showing the general market is not heavily selling off.**

Examples:

On Friday 3/30, the Nasdaq fell 1.2%. But its volume also fell, showing a reticence to sell off current holdings. The lighter volume told us the Nasdaq did not have a distribution day (a day of heavy selling that day..

Every Uptrend has down days along the way. Wednesday was one of those days. But I repeat, the impact of Nasdaq's drop was softened with lighter volume.

If you go to page 5 of today's newsletter, you will see the price/volume action of the Nasdaq for the last 20 market days. On that table, note the Nasdaq price-volume action over the last 12 days of the new Uptrend. **What's missing? Not a single distribution days** (a day when the price drops on higher volume) since the new Uptrend began. WOW! **This is a healthy Uptrend.**

The sum of stocks with Accumulation ratings of A or B has risen from 34% to 46% in the last 2 weeks! That shift says big money has been buying this market. See page 6.

Two down days is not enough to kill this Uptrend. (It is a light threat) The Nasdaq's 15% rise in just 12 days is extraordinary. A couple of down days is OK.

BUT.... I am on the lookout for additional sign of weakness. Stay tuned!

===== YOUR ASSIGNMENT:

- (1) If you follow the Armchair Investor, you know to **have a position in the QQQ to follow the rising market**. (It's not too late to grab this trend-following position. I hold a QQQ position in every uptrend. Yes, I go to cash in uncertain markets, and very occasionally the inverse PSQ to make money during a powerful downtrend)
- (2) Next **build your watch list of top stocks** with strong ratings, ready to break out of well-formed bases (or recently broken out of bases or other buy points). Avoid the desire to jump in early. There are so many stocks making good moves with great financials now, you don't have to compromise your rules.
- (3) **If you have identified a strong stock (ratings, charts, etc.) that is breaking out,...** **it may be time to buy a position in these best stocks**. As of this writing, the market is in an Uptrend which says you should be looking for the best stocks, at the right time to add to your portfolio.

Note: I rarely own more than 5 individual stocks plus a trend-following position – usually in the QQQ. If you could own the best 5 stocks, why would you want to own more? Owning more is OK as long as you have the time to track each stock daily. **With a little practice, this daily review can be accomplished in 10 minutes or less.**

Charlotte Hudgin, The Armchair Investor

A NOTE ABOUT CURRENT DISTRIBUTION DAYS:

Every Uptrend has DISTRIBUTION DAYS along the way. **A distribution day occurs when a stock or index drops 0.2% or more with higher volume. It points to higher selling than buying. We know:**

- **No stock or market index rises every day, even in an Uptrend.** (And no stock or market index falls every day in a Downtrend).
- **If the index or stock falls in an Uptrend, we prefer the volume to be lighter, showing the general market is not heavily selling off.**

Examples:

On Friday 3/30, the Nasdaq fell 1.2%. But its volume also fell, showing a reticence to sell off current holdings. The lighter volume told us the Nasdaq did not have a distribution day (a day of heavy selling that day..

Every Uptrend has down days along the way. Wednesday was one of those days. But I repeat, the impact of Nasdaq's drop was softened with lighter volume.

If you go to page 5 of today's newsletter, you will see the price/volume action of the Nasdaq for the last 20 market days. On that table, note the Nasdaq price-volume action over the last 12 days of the new Uptrend. **What's missing? Not a single distribution days** (a day when the price drops on higher volume) since the new Uptrend began. WOW! **This is a healthy Uptrend.**

Track the sum of stocks with Accumulation ratings of A or B in the last 2 weeks! That shift will tell you whether Wall Street money is buying, holding or selling the current market. See the Accumulation/Distribution Ratings table in this newsletter.

Stay tuned daily!

NO ONE KNOWS THE EXACT MARKET TOPS AND BOTTOMS UNTIL AFTER THEY HAPPEN (You can see them in the rearview mirror.)
A "BUY AND HOLD" STRATEGY rarely pays off better than the smart market timing as shown in this newsletter.

>>>> The Armchair Investor newsletter is produced every day the market is open, as it has for the last 21 years (I’ve missed less than 1 day a year on average) when I was traveling in jungles in South American, had no internet when cruise ship parked behind mountains in Alaska, flying across the Atlantic before on-flight internet, a few days too sick, 2 days computer problem. (Not a bad record!)

Current Signs of Market Strength as of Friday 4/29/2022

This list is updated on Fridays (and in between *as time allows.*)

- The Nasdaq holding 2.3% above recent (3/14/2022) low.
- The S&P500 is UP 2.7% from recent (3/4/2022) end-of-day low.
- The stocks with A or B ratings were flat over the last 4 weeks.

Current Signs of Market Weakness

- The NASDAQ and S&P500 is significantly below its 200-day and at its 50-day moving average lines.
- The Nasdaq is 2.8% below its 50-day line and 14.7% below its 200-day m.a. line.
- When a 50-day moving average line crosses below a 200-day line, the index is showing significant weakness. That is why the event is called a “DEATH CROSS.” On Friday, 2/28, the Nasdaq had a death-cross and the S&P500 its own death-cross on 3/14.
- The Nasdaq is 21.0 % below its all-time high on 11/22/21.
- The S&P500 is 11.4% below its all-time high on 1/4/2022
- The volume on Friday’s 2.6% Nasdaq drop was 15% below average and below average, showing a lack of selling in the Nasdaq.

WHAT HAPPENED LAST WEEK

This page of the newsletter is shown at the beginning of the Armchair Investor newsletter only on the Weekend edition. On other days of the week it is tucked

4/29/2022 WEEKLY SUMMARY: The market ended the week DOWN less than 1% across the boards.

MARKET ACTION 2022 YEAR-TO-DATE			
4/29/22	2021 Closing Price	Current Price	2022 Gain %
Nasdaq	15644.97	12334.64	-21.2%
S&P 500	4766.18	4131.93	-13.3%
DJIA	36338.30	32977.21	-9.2%

Another failing week for the market

LAST WEEK'S DAILY MARKET ACTION						
	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	FOR THE WEEK
	4/25	4/26	4/27	4/28	4/29	
Nasdaq	+1.3%	-4.0%	-0.0%	+3.1%	-4.2%	-3.9%
Volume	+8.9%	+6.1%	-7.3%	+7.2%	-6.6%	
Type of Day	Major Accumulation	Major Distribution	Neither	Major Accumulation	Neither	
<p>A Major Accumulation Day: Price RISES at least 1.0% or more with higher Volume than prior day. A Major Distribution Day: Price FALLS at least 1.0% or more with higher Volume than the day before. A Minor accumulation Day: Price RISES at least 0.2% and less than 1% with strong Volume (either higher than day before or is well-above average volume). A Minor distribution Day: Price FALLS at least 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume). A Neither day: Price/volume action does not meet accumulation or distribution criteria</p>						

Please tend to your individual stocks!

REMEMBER:

If your stocks are holding up well, it is OK to continue holding them in a Downtrend (correction.) But it may make sense to sell a stock that is falling hard.

I am looking forward to the LIVE Dallas and Ft Worth Armchair Investor and IBD Meetups, but not yet!

At the end of 2020. Charlotte wrote:

Since 2003, I have had the honor of presenting the ARMCHAIR INVESTOR weekly classes and the monthly INVESTOR'S BUSINESS DAILY Meetups in Dallas and in Fort Worth.

A special “Thanks!” to all of you who support us, showing up early to set up the rooms, greet guests and the necessary food tasters at our Christmas parties (but not this year.) I look forward to enlisting your help when we start back with LIVE Meetups!—

I especially thank you to:

- **Fred Richards** for his amazing market insights and presentations to the group. He is in the process of moving to a new home in the area and I expect to have him join us in the future.
- **Ron Shaw** for tirelessly greeting guests (one of the most organized, happy guys I know) and handing out the printed copies of the class notes.
- **Nick Pollard** for setting up so many great restaurant meeting rooms. (RIP)
- **And all the others** who greeted first time guests, substituted for Ron, found meeting space or stepped in at the last minute to find extension cords, extra tables and chairs, etc. etc. etc.
- The good news, with Wi-Fi, I plan on continuing the Online Meetups!
- It takes a village! Thank you.

Join the next combined Dallas and Fort Worth Investor's Business Daily's ONLINE Meetup 6:30 – 8:30 p.m. usually on the fourth or last Wednesday of each month. Watch out! Meetup dates change to avoid holidays in November and December.

Register below. This are one combined ONLINE Meetup:

Register either way for the same Meetup.

- Register for the [Dallas IBD Meetup](#)
- Register for the [Fort Worth IBD Meetup](#)

PRIOR NOTE ABOUT THE CURRENT ECONOMY:

A few notes on recent inflation (repeat of yesterday's list):

- **The latest jobs report shows strong hiring and wage growth.**
- **But there's a concern: Is the Labor market overheating?**
- **If the Federal Reserve is concerned about inflation, they will "supersize" the planned May interest rate increase to 1/2%.**
- **The March jobs report showed job growth of 431,000, the 11 month in a row over 400,000, the longest period of this growth since the numbers were recorded in 1939!**

My point is, the economy is growing well and, therefore, expanding. Inflation rather than employment is now the current concern.

NOTE ABOUT CURRENT DISTRIBUTION DAYS:

Every Uptrend has DISTRIBUTION DAYS along the way. **A distribution day occurs when a stock or index drops 0.2% or more with higher volume.** It points to higher selling than buying. We know:

- **No stock or market index rises every day, even in an Uptrend.** (And no stock or market index falls every day in a Downtrend).
- **If the index or stock falls in an Uptrend, we prefer the volume to be lighter, showing the general market is not heavily selling off.**

Examples:

On Friday 3/30, the Nasdaq fell 1.2%. But its volume also fell, showing a reticence to sell off current holdings. The lighter volume told us the Nasdaq did not have a distribution day (a day of heavy selling that day..

Every Uptrend has down days along the way. Wednesday was one of those days. But I repeat, the impact of Nasdaq's drop was softened with lighter volume.

If you go to page 5 of today's newsletter, you will see the price/volume action of the Nasdaq for the last 20 market days. On that table, note the Nasdaq price-volume action over the last 12 days of the new Uptrend. **What's missing? Not a single distribution days** (a day when the price drops on higher volume) since the new Uptrend began. WOW! **This is a healthy Uptrend.**

The sum of stocks with Accumulation ratings of A or B has risen from 34% to 46% in the last 2 weeks! That shift says big money has been buying this market. See page 6.

Two down days is not enough to kill this Uptrend. (It is a light threat) The Nasdaq's 15% rise in just 12 days is extraordinary. A couple of down days is OK.

BUT.... I am on the lookout for additional sign of weakness. Stay tuned!

===== YOUR ASSIGNMENT:

- (4) If you follow the Armchair Investor, you know to **have a position in the QQQ to follow the rising market**. (It's not too late to grab this trend-following position. I hold a QQQ position in every uptrend. Yes, I go to cash in uncertain markets, and very occasionally the inverse PSQ to make money during a powerful downtrend)
- (5) Next **build your watch list of top stocks** with strong ratings, ready to break out of well-formed bases (or recently broken out of bases or other buy points). Avoid the desire to jump in early. There are so many stocks making good moves with great financials now, you don't have to compromise your rules.
- (6) **If you have identified a strong stock (ratings, charts, etc.) that is breaking out,...** **it may be time to buy a position in these best stocks**. As of this writing, the market is in an Uptrend which says you should be looking for the best stocks, at the right time to add to your portfolio.

Note: I rarely own more than 5 individual stocks plus a trend-following position – usually in the QQQ. If you could own the best 5 stocks, why would you want to own more? Owning more is OK as long as you have the time to track each stock daily. With a little practice, this daily review can be accomplished in 10 minutes or less.

Charlotte Hudgin, The Armchair Investor THE NASDAQ UPWARD AND DOWNWARD CHANNELS

One of the features I like about **Investors.com's MarketSmith charts** is that I can draw in my own channel lines.

Did you know annotations stay on the MarketSmith charts! Bravo to the designers. My notations will stay on the MarketSmith charts for years! I can go back and visit how I saw the market in 2000, 2008, 2015-16, etc.

That is one of MarketSmith's many truly unique and valuable features! I don't have to figure out what happened in those past periods again. My annotations are there! Vertical red lines identify distribution days (down days with higher volume indicating serious selling.)

>>>> I HIGHLY RECOMMEND IBD's MarketSmith for your investing CHARTS! Note the excellent annotations and markups I have added on the chart below.

All MarketSmith charts include a bumpy blue horizontal line that compares how the price of this financial instrument (stock, ETF, etc.) rises and falls compared to the S&P500. With this valuable tool, you can see if the financial (I'll call them "stocks" for the rest of this article) instrument you are exploring is outperforming or underperforming the S&P500.

MarketSmith is my favorite charting system, available ONLY on INVESTORS.COM.

Nasdaq Daily 12-month chart >>>What's happened in the last 12 months?
NOTICE the previously high-flying Nasdaq sunk from 16,212 to 12,555. It made a convincing upward bounce several times. **LOOK AT THE MOST RECENT BOUNCE PRICE AND VOLUME: Look at the volume on the up-days in the last 2 weeks.** A day with a rising price will have blue volume lines) Note those blue volume bars are higher than many earlier bars. **These higher volume rising days tell you the Wall Street money was flowing into this market, confirming the new Uptrend. Wow!**

When the RS line is rising,... the stock/index price is rising faster than the S&P500 and you are making more money invested in this stock than if you were inve

REMEMBER: BUY & HOLD IS NOT A STRONG INVESTING STRATEGY.

An EXAMPLE OF HOW “BUY-AND-HOLD” COSTS YOU BIG BUCKS.

- Over 2020, a “buy and hold” strategy has earned 16.2% for the S&P500.
- “Buy and hold” worked better for the Nasdaq earning 43.6%.

SHOWING WHAT A “BUYING AND HOLD” STRATEGY PAID OFF THUS FAR IN 2022 – NEVER RECOMMENDED!

4/29/22	2021 Closing Price	Current Price	2022 Gain %
Nasdaq	15644.97	12334.6	-21.2%
S&P 500	4766.18	4131.93	-13.3%
DJIA	36338.30	32977.2	-9.2%

Also note: If you invested with the Armchair Investor strategy in 2020 and 2021, you are UP 69.7%.

Imagine the difference in returns in the chart above if you had just sold your market ETF waited in cash as the market falls and get back in as it starts back up!

- It isn't necessary to get in at the bottom or out at the top
Just stepping out of the market somewhere *near the top* and getting back in *near the bottom* has had a HUGE IMPACT on my portfolio.

DO YOU MAKE THESE INVESTING MISTAKES?

- Do you miss buying a great stock at the price you knew was right?
- Do you sell too early and watch it continue to rise without you?
- Do you hold on too long and lose the gains you just had?
- **Or are you just starting out** and want a simple, proven method that has outperformed the market in just 5 minutes a day?
- Either way, we have an ARMCHAIR INVESTOR class for you!

PICK THE ARMCHAIR INVESTOR ONLINE CLASS THAT'S RIGHT FOR YOU:

Be sure to register for you classes – occasionally they change.
No Tuesday class this week. Register by clicking the **BLUE LINK** at the bottom of this page.

SUNDAY'S 5-Minute Investor with Market Analysis.

This 1-hour class about Market Direction is foundational – If you get the market direction wrong, you are much more likely to lose money. Attended by beginners and experts alike. FREE to all (at the moment). Once you learn this strategy, it's yours for life!

3 TIMES A WEEK Armchair Investor Workshops

Learn how to buy the best stocks at the right time. And then, learn how to track them to identify the right time to take your profits to the bank!

Choose the BEST CLASS for you: Join us on **MONDAY** 7 – 9 P.M. **Tuesday** 2:30 – 4:30 p.m. or **Wednesday** (10 a.m. – noon) for an [online Armchair Investor class](#)

<<. Are you new to the Armchair Investor classes? **Visit for 2 weeks FREE as my guest!** Call or text me at 214-995-6702 to let me know you are coming.

SUNDAY: Learn to be a 5-Minute Investor!

This strategy has earned over 55% last year – following my 9 trades.

The weekly 1-hour class about Market Direction is foundational – If you get the market direction wrong, you are much more likely to lose money. This bi-weekly class is attended by beginners and experts alike. Open to all (at the moment). We meet every-other Sunday with some adjustments around holiday weekend, and other events.

Join us by registering on this link: [online Armchair Investor class.](#)

TUESDAY, WEDNESDAY or THURSDAY Armchair Investor Stock analysis 2-HOUR CLASS

This class is given 3 times each week. Choose the BEST TIME for you: Join us on Tuesdays 2:30 – 4:30 p.m. or Wednesday 10 a.m. – noon or Thursday 6:30 – 8:30 for an [online Armchair Investor class](#) Be sure to check for the date you wish to visit. The class meets 11 weeks each quarter (2 weeks off for research, study and fun).

To join us for a class, click here: [online Armchair Investor class](#)

Once you register online – the link to your online meeting will be revealed on the Armchair Investor Meetup site. Be sure to note the PASSCODE! When you register for an online Armchair Investor class, suggest a few stocks to review in the class! Please choose profitable growing stocks. *If you own a stock and are considering SELLING THAT STOCK, please note “SELL?” after the ticker.*

COMPARISON of Nasdaq and S&P500 1-YEAR Returns

The chart below shows the last 1-YEAR returns (in percent growth) of the **Nasdaq and the S&P500**. Although the Nasdaq almost always outperforms the S&P500, in the box below, you see a 2-month period where the S&P500 is rising, while the Nasdaq is falling.

Even though I have made great returns in the **QQQ** (the 100 largest, non-financial stocks on the Nasdaq), the ETF's current failing may indicate it has gotten too high, too fast.

REMEMBER: BUY & HOLD IS NOT A STRONG INVESTING STRATEGY.

Imagine the difference in returns in the chart above if you sell your market ETF and move to cash as the market falls and get back in as it starts back up!

I have sold all of my QQQ and now hold those dollars in cash.

- It isn't necessary to get in at the bottom or out at the top!
- Just stepping out of the market somewhere *near the top* and getting back in *near the bottom* has had a HUGE IMPACT on my portfolio.

It can take YEARS to complete a market Downtrend (correction) then recover back to where you were - **an EXAMPLE OF HOW "BUY-AND-HOLD" COSTS YOU BIG BUCKS.**

- **If you invested with the Armchair Investor strategy, you were UP 55.5% for 2020.** Twelve trades for an extra 11.9%! That is the total the market makes in some years.
- Where do you want your money invested? Here's where many answers: "The **Armchair Investor strategy! It's fast and beats many other methods**

MARKET/CHART READING LESSON:

The MarketSmith Relative Strength Line – My favorite!

Go to any chart on the Investors.com web page. You will see the bumpy line labeled RS for Relative Strength. This line moves up or down with each price bar showing if this stock or index rose more or less than the S&P500.

Look at the Nasdaq daily chart (0NDQC) and notice that the RS line has risen since the Oct 2019 low, indicating it has earned higher returns.

Go to the monthly chart and note that the S&P500 has consistently outperformed the S&P500 (not ever month but most). The S&P500 does have some great stocks. That rising RS line tells us that, over time, the Nasdaq as a whole has done better than the S&P500. But just like shopping for groceries, I will buy from the market that has the best fruit, on any given day.

The Nasdaq continues to outperform the S&P500. Watch the RS line on Investors.com charts. This important line shows you how a stock or index is performing compared to the S&P500. A rising line indicates that stock or index has risen faster than the S&P500 (measured in percentage change.)

Note: Do not confuse IBD's RS line with the RSI line some charting system use. The S measures how a stock is moving compared to the S&P500. Rising faster gives a higher rating. *Investopedia.com states: The relative strength index (RSI) is a momentum indicator that measures the magnitude of recent price changes to evaluate "overbought" or "oversold" **conditions** in the price of a stock or other asset.*

The problem I have found with the RSI line is that some of the best, rising stocks can push an RSI line to the top of the rating (indicating overbought) just when I have a buy signal. As always, I tell you to use the indicators you find useful (profitable).

I am excited about the settling down in market volume. But I continue to be concerned about the sustained day-to-day price volatility. It is surely affected by the uncertainty of the upcoming earnings announcements. **BE SURE YOUR STOPS ARE IN PLACE.**

Every Day's Lesson: Whether you agree with your stock's daily results or not...

- **YOUR JOB is to monitor its daily results and adjust your action accordingly.**
 - **Monday: Monitor.....and.....adjust.**
 - **Tuesday: Monitor.....and.....adjust.**
 - **Wednesday: Monitor.....and.....adjust.**
 - **Thursday: Monitor.....and.....adjust.**
 - **Friday: Monitor.....and.....adjust.**
 - **Next week: (repeat)**

KEY MARKET CONCEPTS USED IN THIS NEWSLETTER

If the horse you are riding, dies. GET OFF!

When the market (or your stock) dies – whether that is in a year, a month or tomorrow, the Armchair Investor Strategy will NOT “stay the course” and we won’t ride a falling market down.

Instead, we will use our 20 years of market direction experience to identify optimum times to be in the market and times to be out of the market. (No guaranties!) (PS I love horses. They are amazing companions.)

Using my day-to-day price-volume analysis, my students and I have consistently been able to make money by:

“Getting IN near the bottom” and “Getting OUT near the top.”

The Armchair Investor strategy has allowed me to earn well-above-average returns since the 2000 top! And this year took a big hit in the first 2 1/2 months but it now shown good upward growth!

“Knowledge is Power”

THE LESSON: Riches await the patient investor.

The start of 2021 was volatile for the **Nasdaq**: A rising month and a half, taking it all and more back in the nest month, rising to the prior high over the next 2 months, giving back most of it in the next 2 weeks. The reward for your patience was the 2-month rise of 13.1% ending up . The half year results: +14.1%; **now UP 17.1%**.

Meanwhile, the slow but steadily rising **S&P500** beat the Nasdaq, **now +21.0%**.

The Lesson: All indexes had admirable half year returns! **Occasionally, the S&P500 wins.**

Prepare yourself for a NEW ECONOMY!

I expect a major shift in how we do business: more online appointments, more working from home, reduced business travel (with reduced costs to businesses) We might actually see this lockdown period as **a slingshot into a new, sleeker way of conducting business. And each of those new trends will help some business (online meetings, internet providers, online schools, casual clothing, healthy ready-to-eat food....)**

>>>>>>>> I would like to hear your ideas of where the big gains will occur!

**Which industry groups and specific companies will thrive and?
which will dive in the after pandemic new economy???**

WILL HISTORY REPEAT ITSELF? In the financial crisis of 2007, it took the market 2 1/2 years to recover the 56% drop. Worse yet was the reaction to the dot.com 90's market over-inflation that crashed in March of 2000 and took 19 years for the market to "break even."

WHAT CAN WE (INDIVIDUAL INVESTORS) DO NOW? ONE lesson I have learned from every greatest investor I have studied:

HUMAN NATURE DOESN'T CHANGE.

That is why the cups and handles, double bottoms, etc. continue to work.

HUMAN NATURE DOESN'T CHANGE. Human's nature is to survive and we are, therefore, fear and greed driven. And that is what cups and handles, double bottoms, etc. are all about.

Stick with the Armchair Investor non-emotional, fact-based analysis to ride the market as it rises and exit as it falls. I have never been ashamed of exiting a failing market or stock.... or of riding a winner up, no matter what "they" say.

A SIMILAR TIME IN HISTORY I've been looking for past examples and see a close one in 1998: a 33% drop during the "dotcom" rally in 1998, Everyone was sure 1998 was the top and got out. When it turned around, they all jumped in again.

When the 2000 crash occurred, their brokers told them to stay in because, "...It always comes back! Just look at 1998. When this market fails, I will just say, "GET OUT."

Reminder: I do not make recommendations - just ideas to consider.

CALL ME IF YOU ARE STUCK! Charlotte – 214-995-6702

**>>>With Covid out there, I'm just hanging around the house,
waiting for your call!**

BONUS CHART-READING HISTORY LESSONS:

Look at a Nasdaq or S&P500 daily chart as it crashed off the February 2020 all-time highs. (Charts are at the end of this newsletter.)

Notice the DOWN-TRENDING pattern of:

- frequent higher volume DOWN days (serious selling) and
- frequent lower volume UP days (lack of commitment to the upward move).

NOW NOTICE A SHIFT IN the PRICE-VOLUME PATTERN AS THE MARKET SLOWED DOWN AND THEN STARTED RISING:

- More consecutive rising days with higher volume (Nasdaq)
- A fresh upward move of 4 rising days in a row (Nasdaq)
- Those moves in the last week bring hope that this Uptrend is gathering steam AND it brings a concern that irrational exuberance may be driving this Uptrend.
- EITHER WAY – I am happy to ride this Uptrend until it dies... next week, next month or next year. **STAY TUNED!**

This “change in personality” is common when a Downtrend becomes an Uptrend.

DISTRIBUTION DAYS: >>> Scan across the volume over the last four weeks on a daily chart below. You will see almost all the tall volume bars (sticking up above their neighbors) are ... RED, showing higher volume on down days. T

HOW TO SEE DISTRIBUTION ON 2-COLOR CHARTS!

Distribution action is easiest to see when you are on a chart with two color volume lines, usually red for falling price days and green (or blue) for rising days. The fastest way to get a sense of the accumulation/distribution going on in a stock or index is to swing your eyes across the volume bars – noting the color of the highest bars - the red volume bar indicates the price dropped that day. The taller bar indicates the volume was higher. (MarketSmith and other IBD charts have this 2-color feature!

REMEMBER:

**THE MARKET CONTINUES IN THE DIRECTION IT IS GOING,
... UNTIL IT DOESN'T!**

>>>>But be sure to watch each stock in your portfolio for additional distribution days to signal an exit point. See selling rules chapter of “How to Make Money in Stocks” by William O’Neil, founder of Investor’s Business Daily.

THE ARMCHAIR INVESTOR TREND-FOLLOWING STRATEGY

A Simple and Powerful Tool to Increase Your Returns

Armchair Investor Mantra:

- **Be IN the market** when it is going up
- **Be OUT of the market** when it is going down
- **Protect your portfolio** with 8% stops.

The primary purpose of this Armchair Investor newsletter is to let you, the reader, earn bigger returns riding the trend of the market.

By following the best (most reliable) market change signals, you can:

- **Get in the market near the bottom** of a new bull market
- **Exit the market near the top**, and
 - **Capture more of the gains**,
 - **Avoid more of the losses** and, thus
 - **Earn higher returns** than the “buy-and-hold” strategy recommended by many brokers and money managers!

Why a “Buy-and-Hold” strategy doesn’t work well:

When the market has topped and starts to fall, do you really want to let your profits fade away as the market falls – sometimes for years? Of course not! Selling your uptrend position allows you to capture your gains and store them safely away in cash. What is the right time to exit? This newsletter will show you the market’s signal.

Most downtrends (also called corrections) fall faster than the uptrends rise.

I am not willing to sit in a sick, falling market and lose my hard-earned gains!

Cash is a safer position!

Here are the three signals I will give you in this newsletter for the three market conditions:

- **Uptrends:** When the market rises into an Uptrend, buy and hold the QQQ, a stock that rises with the general market.
- **Uptrend showing Weakness:** As a market Uptrend starts to fall, you will receive the signal to exit the QQQ and safely wait in cash.
- **Downtrends:** If the market continues down, you will receive a signal to buy the PSQ, a stock that rises while the market falls.

FINALLY – For individual stocks: Use these market signals to help you when buying individual stocks. You increase your likelihood of a successful stock purchase if you only buy stocks when the market is in an Uptrend. Lesson: Don’t fight the market trend!

**HOW CAN YOU CAPTURE THOSE?
GREAT MARKET GAINS SHOWN ABOVE?**

USE THE ARMCHAIR INVESTOR PLAN:
It's as easy as 1- 2- 3!

STEP 1: Ride a rising market - hold the QQQ.

STEP 2: Protect your investments during a weakening Uptrend

STEP 3: Go to cash or PSQ in a falling market.

This newsletter will identify the market direction, (step 1, step 2 or step 3) and explain what you can do to grow and protect your portfolio.

STEP 1: In an Uptrend, hold the QQQ, a Nasdaq100 ETF

Find the market direction diagnosis every night in this newsletter.

- In the Uptrend, buy the QQQ the next morning if you don't yet have that position. This newsletter will alert you to the Uptrend signal! *The QQQ follows the ups and downs of the Nasdaq100, allowing you to grab the rises of an Uptrend.*
- With some additional positive action, you may decide to switch to the double QQQ ETF (QLD) or triple QQQ (TQQQ). I do not recommend these moves for the first-time investor.

Just in case protection: When you receive your confirmation of the purchase, place an **8% STOP LOSS** order to protect your portfolio from a sudden market reversal (executing this sale is rare – I almost always sell when the market goes into “under pressure” or Downtrend – see Step 2 below). Your broker can help you set up this order.

This upward ride is the most exciting part of trend-following – Ride the escalator up, up, up as the market rises. Exit when the market starts to show significant weakness (read this newsletter nightly!

Although not every Uptrend signal generates a positive return, most do.

STEP 2: When the Uptrend slows down: “Uptrend under Pressure”

“Uptrend under Pressure” is a Warning Message and means:

- The market is showing significant distribution (selling pressure.)
Investors should:
 - **Be concerned about the strength of this Uptrend.**
During an Uptrend under Pressure, this newsletter may move into CASH position to avoid possible losses.
 - **Check on the health of your investments each night!** Many investors do not buy new stock positions during this period due to higher failure rates.
- **From STEP 2, “Uptrend under Pressure,”** the market diagnosis will go one of two ways:
 - **Rise** with price and volume strength, and return to **Uptrend – (STEP 1)**, or
 - Continue to add more distribution days and **fall** into a **Downtrend (correction)**
- This is a time to pay attention to the market behavior.

STEP 3: When the market diagnosis goes to “Downtrend”

Capture much of the gains from the Uptrend by selling your Uptrend ETF position (QQQ, QLD or TQQQ) when the market diagnosis goes into Downtrend to capture much of the gains earned in Steps 1 & 2 above.

After exiting the Uptrend ETF, wait in cash until the next Uptrend signal. More recent Downtrends have been short term and not tradable.

The Uptrend has been years long and strong. The market is due for a long dive. I will invest in the PSQ (inverse QQQ) ETF which makes profits as the market falls!

NOTE: Not every market direction signal end with a positive return. But overall, this Market Tracking Strategy has outperformed the market when traded according to these signals.

BONUS: Plus, the market direction signals will help you by indicating when it is most effective to consider adding individual stocks to your portfolio (with a strong uptrending market).

DO YOU INVEST IN INDIVIDUAL STOCKS?

Always consider taking some profit if significant distribution is showing up for your individual stocks. However, many individual stocks are rising with gusto! Look at all the lists in the Investor's Business Daily newspaper for stocks breaking out with high volume. **They are there!**

To get a deeper sense of the health of the market, look at the MARKET FACTORS, COUNTS & RATINGS table included each day in the FULL Armchair Investor newsletter. It looks at 7 key market direction factors and highlights the leaning of each:

- If the factor leans toward the **Uptrend**, that box will be **green**
- If the factor leans toward the **Downtrend**, that box will be **orange** or **red**

To schedule a class visit: Contact Charlotte Hudgin at 214-995-6702

One of the reasons I pay so much attention to the Investor's Business Daily strategies and books (*How to Make Money in Stocks* series) is that they have work consistently for the 30 years I have referred to them.

Visit an ARMCHAIR INVESTOR CLASS

We have 3 live classes given live most weeks. These classes will be given ONLINE until we are cleared to meet in person. Visit any class this week and next as my guest (2 free visits!). NOTE: We are on vacation the last 2 weeks in December. *If you are a subscriber, or have a relatively short question, call me anyway!* (I'm mostly hanging around the house.) The underlined phrases below are live links!

Register at the [Armchair Investor Meetup class site](#) to join the class you are interested in. Click on one of the links below to register. I occasionally take off for a class (or a week of them) for my own education or fun. If that is the case, those days will not be available for registration on Meetup.

- [Introduction to 5- minute investing Sundays 7 – 8 p.m.](#)
- [Monday nights 7 – 9 p.m.](#)
- [Tuesday afternoons 2:30 – 4:30 p.m.](#)
- [Wednesday mornings 10:00 a.m. to noon](#)
- All Classes meet ONLINE (during this “stay at home” time).
- Online classes and consultations available by appointment – **Call me for a FREE introduction!**

Newsletter readers get a FREE class visit:

Monday evening, Tuesday afternoon or Wednesday morning online.
Register on Meetup.com or call or text me to set up your visit.

Pre-REGISTRATION REQUIRED FOR YOUR FREE VISIT

Just Call or Text me: 214-995-6702

CALL EARLY: Guest Seating is limited.

2022 THE MARKET HOLIDAY SCHEDULE

I'm updating my 2022 spreadsheet and calendars to note the days the market is closed and has an early close and will update the newsletter next week.

NOTE: There will be no market holiday around the Saturday 2022 New Year's day this year.

The Nasdaq Stock Market and New York Stock Exchange (NYSE) close for nine holidays each year and two "early closure" days (sometimes misnamed "half days"):

Here is the 2022 holiday closure schedule for the NYSE and Nasdaq:

Holiday	2022
Martin Luther King, Jr. Day	Monday, January 17
Washington's Birthday	Monday, February 21
Good Friday	Friday, April 15
Memorial Day	Monday, May 30
Juneteenth National Independence Day	Monday, June 20 (Juneteenth holiday observed)
Independence Day	Monday, July 4
Labor Day	Monday, September 5
Thanksgiving Day	Thursday, November 24*** Plus "early close" on Friday November 25
Christmas Day	Monday, December 26 (Christmas holiday observed)

New Year's Day 2023

On regular trading days, the main trading session runs the normal schedule of 9:30 a.m. to 4 p.m. (New York City time, i.e., Eastern time)

On early close trading days, the main trading session runs from 9:30 a.m. to 1 p.m. ET.

When a holiday falls on a Saturday, the NYSE and Nasdaq close on the Friday before. Holidays that land on a Sunday are observed on the following Monday.

Access the FULL ARMCHAIR Investor newsletter each night in just 2 clicks:

WWW.ARMCHAIRINVESTOR.COM

The go down to the bottom of the page – click on **ARCHIVE**

The **Archive will be open** until we work out the new **subscription-only** access system.

To guarantee your continued access to this newsletter, sign up for a newsletter subscription or for the weekly classes (which include the newsletter)

Wishing you "**Many Happy Returns,**"

Charlotte Hudgin, 214-995-6702, Editor, the Armchair Investor

DISCLAIMER, "Buyer Beware" WARNING:

This newsletter shares the ideas I use in my investing.

It is not investing advice but should be taken as education only.

Your investment decisions are your responsibility as are the results.

If you are not comfortable with or do not understand a strategy completely,

I recommend that your paper-trade until you are successful and can sleep well at night.

Call me to explore your investing questions!

Charlotte Hudgin, 214-995-6702

Is this market “Climbing a Wall of Worry”

DO INVESTORS IN INDIVIDUAL STOCKS BEAT THE MARKET?

The research shows [Most investors didn't come close to beating the S&P 500](#) (as stated by CNBC.)

But what you should really be concerned about isIS THIS MARKET HEALTHY? My answer: Follow the accumulation and distribution days!

- A market with **just a few distribution days** in since the last market **UPTREND** showing **broad market buying**. Then look for **distribution days**. You can see just one since the new Uptrend. See the **MARKET ACTION (Nasdaq) OVER THE LAST 20 DAYS** table.
- Explanation: When an index rises 5% or more above the close of a distribution day, then that day is considered, “NO LONGER RELEVANT!” The market is hot-dogging higher and those distribution days are long gone from the rear-view mirror.
- A steadily rising market is more sustainable! Watch for additional distribution days.
- **The current up-channel is not quite as steep as last year's 5-month rising channel. That could mean that it won't last as long. Or that, because of the gentler rise, it will last longer.**

How long will the rise run? (You know my answer: The market will continue higher until..... it doesn't.)

The Armchair Investor Strategy earned **extraordinary returns for **2020** (see the table on prior page). And YOU could have earned this return shown below if you followed this nightly newsletter and made these 12 trades, all broadcast at the end of the day for your action the following morning. Read this newsletter and reap the rewards!**

EXAMPLE of the DAILY MARKET ACTION table
with explanation of terms and signals:

THE DAILY MARKET ACTION (NOT CURRENT PRICE & VOLUME)						
9/27/19	Index Close	Index % Change	Volume % Change	Volume vs 50-day Avg.	Accumulation or Distribution Day?	Recent Trend Gain/Loss from 8/13/2019 UPTREND SIGNAL
Nasdaq	7,939.63	-1.1%	+8.5%	-11.0%	Major Distribution	+1.7%
S&P500	2,961.79	-0.5%	NYSE Volume		Minor distribution	+3.4%
DJIA	26,820.25	-0.3%	+5.1%	-12.0%	Minor distribution	+3.8%

A **Major Accumulation Day**: Price RISES 1.0% or more with higher Volume than the day before.

A **Minor accumulation Day**: Price RISES 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).

A **Major Distribution Day**: Price FALLS 1.0% or more with higher Volume than the day before.

A **Minor distribution Day**: Price FALLS 0.2% and less than 1% with strong Volume (either higher than the day before or is well-above average volume).

If the day's price/volume action does not meet the accumulation or distribution definitions above, it is a **neither day**.

** The **Recent Trend Gains/Losses** column calculates how far each index has moved from the recent trend change assuming you purchased the index (in an Uptrend) or sold the index (in a Downtrend) at the opening price on the day after the signal. Although not every year outperforms the common "buy and hold" strategy, using these signals has significantly **OUTPERFORMED** the buy-and-hold strategy in total since 1/1/2000.

Why are my Final Volumes sometimes Different than Yours? Why do the volume numbers on this table not always match other web sites? The 4:00 close of the market immediately shows an accurate final price. But the volume figures continue to trickle in for hours. At some time, the accumulation of volume numbers has to be cut off and different sites use different cut-offs. Also, some sources include the volume of stocks listed on one exchange but traded on another (e.g., Apple stock listed on Nasdaq but also traded on other exchanges.) And some sources do not. The most important rule is to consistently use only one source for volume.

DO YOU INVEST IN INDIVIDUAL STOCKS?

Always consider taking some profit if significant distribution is showing up for your individual stocks. However, many individual stocks are rising with gusto! Look at all the lists in the Investor's Business Daily newspaper for stocks breaking out with high volume. **They are there!**

To get a deeper sense of the health of the market, look at the **MARKET FACTORS, COUNTS & RATINGS table** included each day in the FULL Armchair Investor newsletter. It looks at 7 key market direction factors and highlights the leaning of each:

- If the factor leans toward the **Uptrend**, that box will be **green**
- If the factor leans toward the **Downtrend**, that box will be **orange** or **red**

To schedule a class visit: Contact Charlotte Hudgin at 214-995-6702

One of the reasons I pay so much attention to the Investor's Business Daily strategies and books (*How to Make Money in Stocks series*) is that they work consistently.

Visit an ARMCHAIR INVESTOR CLASS

We have 3 live classes given each week in Dallas and one on-demand ONLINE class. Visit a class as my guest (NOTE: Monday night is moving to another day - I don't know when yet.

- [Monday nights, 7 – 9 p.m.](#)
- [Tuesday afternoons 2:30 – 4:30 p.m.](#)
- [Wednesday mornings 10:00 a.m. to noon](#)
- Classes meet ONLINE. When the virus risk is past some classes will resume in north Dallas.
- Online classes and consultations available by appointment – **Call me for a FREE introduction!**

Newsletter readers get a FREE class visit:

Monday evening, Tuesday afternoon or Wednesday morning in Dallas.
Call or text me to set up your visit.

Pre-REGISTRATION REQUIRED FOR YOUR FREE VISIT

Just Call or Text me: 214-995-6702

CALL EARLY: Seating is limited to no more than 3 guests at each session to ensure the paid subscribers receive full value.
